ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

December 31, 2023

First Trust Cloud Computing ETF (the “First Trust ETF”)

This annual management report of fund performance contains financial highlights but does not contain the complete audited annual financial statements of the First Trust ETF. All references to dollars contained herein are to Canadian dollars.

Securityholders may also contact us to request a copy of the First Trust ETF’s proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosures relating to the First Trust ETF by calling 1-877-622-5552, by writing to us at FT Portfolios Canada Co., 40 King Street West, Suite 5102, Scotia Plaza, Box 312, Toronto, Ontario M5H 3Y2 or by visiting our website at www.firsttrust.ca or SEDAR at www.sedarplus.ca.

Forward-looking Statements

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts but instead represent beliefs regarding future events. By their nature, forward-looking statements are based on assumptions and are subject to inherent risks and uncertainties. There is significant risk that forward-looking statements will not prove to be accurate. Readers of this document should not place undue reliance on forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the expectations, estimates or intentions expressed or implied in the forward-looking statements. These factors include but are not limited to market and general economic conditions, interest rates, foreign currency exchange rates, the extent of industry sector exposure, the performance of the securities of the issuers held in the portfolio and regulatory developments and the risks detailed in the First Trust ETF’s prospectus. The Manager does not undertake and specifically disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Investment Objective and Strategy

The fundamental investment objective of **First Trust Cloud Computing ETF** (the “First Trust ETF”) is to replicate, to the extent possible, the performance of an index of U.S. companies involved in the cloud computing industry, initially the ISE CTA Cloud Computing Index™.

The ISE CTA Cloud Computing Index™ is a modified equal weighted index designed to track the performance of companies involved in the cloud computing industry. To be included in the index, a security must be classified as a Cloud Computing company by the Consumer Technology Association.

Risk

The First Trust ETF provides exposure to its index by investing all or substantially all of its assets in an underlying U.S. index fund known as First Trust Cloud Computing ETF (the “Underlying Fund”), which is managed by the First Trust ETF's portfolio advisor.

The risks associated with an investment in the First Trust ETF is discussed in the First Trust ETF's most recent prospectus.

Results of Operations

General

The First Trust ETF's net asset value as of December 31, 2023 was \$2,659,375 or \$20.46 per unit. The First Trust ETF's net asset value as of December 31, 2022 was \$2,064,161 or \$13.76 per unit.

There were no cash distributions paid nor declared for the year ended December 31, 2023.

Investment Performance

For the year ended December 31, 2023, the First Trust ETF returned 48.66% compared to the S&P 500® Index (the “benchmark”) return of 22.90%. Unlike the benchmark, the First Trust ETF's return is net of fees and expenses.

The First Trust ETF's only holding, the Underlying Fund, held 64 equity securities as of December 31, 2023. The top ten equity holdings for the Underlying Fund accounted for 35.19% of the portfolio within the Underlying Fund.

The Underlying Fund outperformed the benchmark during the year due to an overweight allocation in Information Technology, one of the best-performing sectors during the year. The outperformance was partially offset by stock selection within Communication Services.

The Underlying Fund's top five stocks by contribution to return were AppLovin Corporation, MongoDB, Inc., Nutanix, Inc., Arista Networks, Inc., and Amazon.com, Inc. The Underlying Fund's bottom five stocks by contribution to return were Lumen Technologies, Inc., Paycom Software, Inc., Domo, Inc., Rackspace Technology, Inc., and HashiCorp, Inc.

The First Trust's ETF's exposure to the U.S. dollar contributed negatively to its absolute performance during the year as the U.S. dollar depreciated 2.39% against the Canadian dollar from December 31, 2022, to December 31, 2023.

Recent Developments

Cloud computing enables companies to grow their businesses to greater sizes and at faster speeds than ever before as a result of being unhindered by the physical limitations of local networks and devices. In 2023, Gartner reported global cloud spending of \$563.6 billion, representing a 17.8% increase from 2022. Cloud computing growth occurs across a variety of cloud related companies, including cloud storage companies (such as AMZN, MSFT, and GOOG), cloud security companies (such as ZS and NET), and companies with cloud applications (such as CRM and ADBE). The cloud computing industry continues to grow both in depth and breadth as it meets increasing customer needs while introducing additional product offerings. Cloud computing has and we believe will continue to benefit from the growth of cloud infrastructure demand and Generative AI.

First Trust Cloud Computing ETF

Management Report of Fund Performance

For the year ended December 31, 2023

It is no secret that Generative AI had a breakout year in 2023. A major milestone for OpenAI was achieved in early November when it announced that Chat-GPT hit 100 million weekly active users. In addition to Chat-GPT's success, we are seeing the growth of other Generative AI platforms, such as Google's Bard and Anthropic's Claude, and AI integrated product offerings, such as the Meta/Ray-Ban AI glasses and the release of Microsoft Copilot. Over the past year we got the first glimpse of AI's capabilities and potential applications, however there is reason to believe that we are just at the tip of the iceberg. The sheer volume and size of datasets required to build and train AI models suggest that the development of AI will continue to benefit from and depend on cloud computing for functions including storage, training, hosting, development, processing, and more. The relationship between AI and cloud computing is such that AI needs cloud computing in order to fuel its growth, and cloud computing companies are in the unique position to benefit from increased demand for their services out into the future.

(a) Effective February 17, 2021, the First Trust ETF is fully invested in the Underlying Fund.

(1) This information is provided as at December 31 of the years shown and is prepared under IFRS.

(2) Net asset value and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the year.

(3) Distributions were paid in cash or reinvested in additional units of the First Trust ETF, or both. Non-cash distributions are reinvested in additional units of the First Trust ETF and subsequently consolidated. Neither the number of units held by the unitholder, nor the net asset per unit of the First Trust ETF change as a result of any non-cash distributions.

(4) This table is not intended to be a reconciliation of beginning to ending net asset value per unit.

Ratios and Supplemental Data

Portfolio turnover rate ⁽³⁾	0.00%	51.44%	82.22%	94.18%	107.01%

(a) Effective February 17, 2021, the First Trust ETF is fully invested in the Underlying Fund.

(1) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated year, including the First Trust ETF's proportionate share of the MER of the Underlying Fund in which the First Trust ETF has invested, and is expressed as an annualized percentage of daily average net asset value during the year.

(2) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the year. This includes the First Trust ETF's proportionate share of the commissions of Underlying Fund in which the First Trust ETF has invested.

(3) The First Trust ETF's portfolio turnover rate indicates how actively the First Trust ETF's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the First Trust ETF buying and selling all of the securities in its portfolio once in the course of the year. The higher a First Trust ETF's portfolio turnover rate in a year, the greater the trading cost payable by the First Trust ETF in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between high turnover rate and the performance of a First Trust ETF.

Management Fees

The First Trust ETF will pay the Manager a management fee of 0.15% based on the average daily NAV of the First Trust ETF. The management fee, plus applicable taxes including HST, will be accrued daily and paid monthly in arrears. The Manager may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time.

The First Trust ETF will bear the Underlying Fund's management fee of 0.60% per annum on average daily net assets on the First Trust ETF's portfolio assets invested in the Underlying Fund. Accordingly, the management fee cost to unitholders of their investment will be 0.75% per annum of NAV of the First Trust ETF plus applicable taxes.

Past Performance

General

The past performance information shown assumes that all distributions made by the First Trust ETF in the period/years shown were reinvested in additional securities of the First Trust ETF. The performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the First Trust ETF has performed in the past does not necessarily indicate how it will perform in the future.
