INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE

June 30, 2024

First Trust Senior Loan ETF (CAD-Hedged) (the “First Trust ETF”)

This interim management report of fund performance contains financial highlights but does not contain the complete unaudited interim financial statements of the First Trust ETF. All references to dollars contained herein are to Canadian dollars.

Securityholders may also contact us to request a copy of the First Trust ETF’s proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosures relating to the First Trust ETF by calling 1-877-622-5552, by writing to us at FT Portfolios Canada Co., 40 King Street West, Suite 5102, Scotia Plaza, Box 312, Toronto, Ontario M5H 3Y2 or by visiting our website at www.firsttrust.ca or SEDAR at www.sedarplus.ca.

Forward-looking Statements

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts but instead represent beliefs regarding future events. By their nature, forward-looking statements are based on assumptions and are subject to inherent risks and uncertainties. There is significant risk that forward-looking statements will not prove to be accurate. Readers of this document should not place undue reliance on forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the expectations, estimates or intentions expressed or implied in the forward-looking statements. These factors include but are not limited to market and general economic conditions, interest rates, foreign currency exchange rates, the extent of industry sector exposure, the performance of the securities of the issuers held in the portfolio and regulatory developments and the risks detailed in the First Trust ETF’s prospectus. The Manager does not undertake and specifically disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

First Trust Senior Loan ETF (CAD-Hedged)

Management Report of Fund Performance

For the six-month period ended June 30, 2024

Investment Objective and Strategy

The fundamental investment objective of **First Trust Senior Loan ETF (CAD-Hedged)** (the “First Trust ETF”) is to provide unitholders with a high level of current income by investing primarily in a diversified portfolio of senior floating rate loans and debt securities, with capital appreciation as a secondary objective. The First Trust ETF will primarily invest in a portfolio of senior floating rate loans which are generally rated at or below BB+ by Standard & Poor’s, or Ba1 or less by Moody’s Investor Services, Inc., or a similar rating by designated credit rating organization (as defined in NI 81-102) and debt securities by holding securities of First Trust Senior Loan Fund, a U.S. listed exchange-traded fund (the “Underlying Fund”). The First Trust ETF will generally seek to hedge substantially all of its U.S. dollar currency exposure back to the Canadian dollar.

The primary investment objective of the Underlying Fund is to provide high current income and its secondary investment objective is preservation of capital. The Underlying Fund seeks to achieve its investment objectives by investing in a portfolio of senior floating rate loans which are generally rated at or below BB+ by Standard & Poor’s, or Ba1 or less by Moody’s Investor Services, Inc., or a similar rating by a designated rating organization (as defined in NI 81-102) and debt securities.

Risk

The overall risk for the First Trust ETF during the period remains as discussed in the most recent prospectus for the First Trust ETF.

The ability of a company/issuer to pay interest and repay principal are not factors controlled by the First Trust ETF’s management. A company may default on their obligation to repay interest and principal which could impact the value of the holdings in the First Trust ETF or the ability to pay a dividend at or above the current level. Companies may also refinance their existing debt (the First Trust ETF’s holdings) which would also impact the level of income available to pay to shareholders.

The First Trust ETF is suitable for investors seeking a high level of current income and potential for capital gains through exposure to a diversified portfolio of below investment grade debt securities.

Results of Operations

General

The First Trust ETF’s total net asset value as of June 30, 2024, was \$54,287,836 or \$16.82 per unit. The First Trust ETF’s total net asset value as of December 31, 2023, was \$35,988,400 or \$16.99 per unit.

For the six-month period ended June 30, 2024, the First Trust ETF paid total cash distributions of \$0.6300 per unit. In addition, the First Trust ETF declared cash distributions of \$0.1000 per unit for record date of June 28, 2024, with payment date of July 8, 2024.

The First Trust ETF’s only holding, the Underlying Fund, held 214 individual positions (0.47% average position size) diversified across 35 industries at the end of the reporting period. The top ten holdings by issuer accounted for 17.92% of the portfolio. Software (18.95%), Insurance (16.20%), and Hotels, Restaurants, & Leisure (7.97%) comprised the top three industries by market value at the end of the period.

Investment Performance

For the six-month period ended June 30, 2024, the First Trust ETF returned 2.66% compared to the Morningstar® LSTA® US Leveraged Loan Index CAD-Hedged (“benchmark”) return of 4.09%. Unlike the benchmark, the First Trust ETF’s returns are net of fees and expenses.

The First Trust ETF’s only holding, the Underlying Fund, maintained its defensive positioning in high quality companies with strong balance sheets and robust cash flow. Throughout the period, the investment team increased the Underlying Fund’s exposure to BB rated credit in an effort to maintain low portfolio volatility and retain liquidity.

First Trust Senior Loan ETF (CAD-Hedged) Management Report of Fund Performance For the six-month period ended June 30, 2024

As of June 30, 2024, the Underlying Fund maintained allocations to BBB rated, BB rated, B rated, and CCC and below rated assets (including Not Rated) of 9.74%, 17.18%, 66.60%, and 6.48%, respectively.

Throughout the reporting period, the Underlying Fund benefitted from its underweight allocation to the telecommunication services sector, as well as its security selection within the commercial & professional services sector. The Underlying Fund maintained an average allocation of 3.16% to the telecommunication services sector, compared to the benchmark's average allocation of 3.98%. Conversely, the Underlying Fund's exposure to the software & services sector and media & entertainment sector detracted from performance. The Underlying Fund's exposure to the software & services sector generated a positive return, though the Underlying Fund's position in a unified communications software provider detracted from performance relative to the benchmark. The Underlying Fund ended the period with 11.59% of assets invested in bonds and 88.41% of assets invested in senior loans, relatively unchanged from the beginning of the period. The Underlying Fund continues to position in high quality bonds and cash to reduce overall portfolio volatility. We expect this defensive positioning to serve the Underlying Fund well over time.

The Leveraged Finance Investment Team's investment process combines rigorous bottom-up fundamental credit analysis and disciplined portfolio construction. The First Trust ETF experienced zero defaults throughout the period, while the Morningstar® LSTA® US Leveraged Loan Index ("LLI") experienced 6 defaults. Since inception, the First Trust ETF has experienced ten defaults; this compares favorably to the 186 defaults experienced by the LLI over that same time period.

Recent Developments

The senior loan market experienced six consecutive monthly inflows throughout the period, resulting in cumulative inflows of \$11.9bn. Senior loan spreads tightened by 30 basis points ("bps") throughout the period, ending at S+460. The current spread is 56 bps below the senior loan market's long-term average spread of L+516, dating back to December 1997.

With two U.S. interest rate cuts priced in for this period, the market's interest rate expectations appear reasonable and US Treasury yields seem fair; consequently, interest rate volatility has declined. The yield ("carry") of today's bond market, coupled with the convexity (non-linear relationship between interest rates and bond prices) offers both additional protection and an attractive total return opportunity to investors. We continue to favor high-quality companies in defensive sectors. As we assess future market opportunities, we employ our disciplined bottom-up credit underwriting process and rigorous approach to risk management.

Related Party Transactions

FT Portfolios Canada Co. is the Manager of the First Trust ETF and is a Canadian affiliate of First Trust Advisors L.P., the investment advisor (the "Advisor") of the First Trust ETF.

Pursuant to terms of the declaration of trust of the First Trust ETF, the Manager provides or arranges for all management, administrative and other services required by the First Trust ETF. The Manager receives a management fee from the First Trust ETF. For further details, please see "Management Fees".

The Manager has retained the Advisor to provide certain services to the First Trust ETF pursuant to an investment advisory agreement. The Advisor receives advisory fees from the Manager out of the management fee.

(a) As of February 28, 2022, the First Trust ETF no longer offered FSL.A and the Manager successfully redesignated FSL.A to FSL of the First Trust ETF.

(b) Effective January 21, 2021, the First Trust ETF was fully invested in the Underlying Fund.

(c) Effective November 4, 2019, First Trust Short Duration High Yield Bond ETF (CAD-Hedged) ("FSD") was merged with the First Trust ETF upon receiving management, regulatory and unitholder approval. Pursuant to the Merger, each holder of common units of FSD automatically received 1.108414 FSL for each common unit of FSD held and each holder of advisor class units of FSD automatically received 1.001905 FSL.A for each advisor class unit of FSD held on the effective date of the Merger.

(1) This information is provided as at June 30, 2024 and December 31 of the period/years shown and is prepared under IFRS.

(2) Net asset value and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the period/year.

(3) Distributions were paid in cash or reinvested in additional units of the First Trust ETF, or both. Non-cash distributions are reinvested in additional units of the First Trust ETF and subsequently consolidated. Neither the number of units held by the unitholder, nor the net asset per unit of the First Trust ETF change as a result of any non-cash distributions.

(4) This table is not intended to be a reconciliation of beginning to ending net asset value per unit.

(a) As of February 28, 2022, the First Trust ETF no longer offered FSL.A and the Manager successfully redesignated FSL.A to FSL of the First Trust ETF.

(b) Effective January 21, 2021, the First Trust ETF was fully invested in the Underlying Fund.

(c) Effective November 4, 2019, First Trust Short Duration High Yield Bond ETF (CAD-Hedged) ("FSD") was merged with the First Trust ETF upon receiving management, regulatory and unitholder approval. Pursuant to the Merger, each holder of common units of FSD automatically received 1.108414 FSL for each common unit of FSD held and each holder of advisor class units of FSD automatically received 1.001905 FSL.A for each advisor class unit of FSD held on the effective date of the Merger.

(1) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period/year, including the First Trust ETF's proportionate share of the MER of the Underlying Fund in which the First Trust ETF has invested, and is expressed as an annualized percentage of daily average net asset value during the period/year.

(2) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period/year. This includes the First Trust ETF's proportionate share of the commissions of Underlying Fund in which the First Trust ETF has invested.

(3) The First Trust ETF's portfolio turnover rate indicates how actively the First Trust ETF's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the First Trust ETF buying and selling all of the securities in its portfolio once in the course of the period/year. The higher a First Trust ETF's portfolio turnover rate in a period/year, the greater the trading cost payable by the First Trust ETF in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between high turnover rate and the performance of a First Trust ETF.

Management Fees

The First Trust ETF will pay the Manager a management fee of 0.15% based on the average daily NAV of the First Trust ETF. The management fee, plus applicable taxes including HST, will be accrued daily and paid monthly in arrears. The Manager may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time.

The First Trust ETF will bear the Underlying Fund's management fee of 0.85% per annum on average daily net assets on the First Trust ETF's portfolio assets invested in the Underlying Fund. Accordingly, the management fee cost to unitholders of their investment will be 1.00% per annum of NAV of the First Trust ETF plus applicable taxes.

Past Performance

General

The past performance information shown assumes that all distributions made by the First Trust ETF in the period/years shown were reinvested in additional securities of the First Trust ETF. The performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the First Trust ETF has performed in the past does not necessarily indicate how it will perform in the future.

Year by Year Returns

The bar chart below shows the First Trust ETF's performance for the six-month period ended June 30, 2024, for the years ended December 31, and for the period from commencement of operations to December 31, 2013, and illustrates how the investment fund's performance has changed from year to year. The chart also shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year.

*First Trust ETF Commencement: August 28, 2013

** Effective January 21, 2021, the First Trust ETF was fully invested in the Underlying Fund.

***As of February 28, 2022, the First Trust ETF no longer offered FSL.A and the Manager successfully redesignated FSL.A to FSL of the First Trust ETF.
