ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

December 31, 2024

First Trust NASDAQ® Clean Edge® Green Energy ETF (the “First Trust ETF”)

This annual management report of fund performance contains financial highlights but does not contain the complete audited annual financial statements of the First Trust ETF. All references to dollars contained herein are to Canadian dollars.

Securityholders may also contact us to request a copy of the First Trust ETF’s proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosures relating to the First Trust ETF by calling 1-877-622-5552, by writing to us at FT Portfolios Canada Co., 40 King Street West, Suite 5102, Scotia Plaza, Box 312, Toronto, Ontario M5H 3Y2 or by visiting our website at www.firsttrust.ca or SEDAR at www.sedarplus.ca.

Forward-looking Statements

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts but instead represent beliefs regarding future events. By their nature, forward-looking statements are based on assumptions and are subject to inherent risks and uncertainties. There is significant risk that forward-looking statements will not prove to be accurate. Readers of this document should not place undue reliance on forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the expectations, estimates or intentions expressed or implied in the forward-looking statements. These factors include but are not limited to market and general economic conditions, interest rates, foreign currency exchange rates, the extent of industry sector exposure, the performance of the securities of the issuers held in the portfolio and regulatory developments and the risks detailed in the First Trust ETF’s prospectus. The Manager does not undertake and specifically disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

First Trust NASDAQ® Clean Edge® Green Energy ETF

Management Report of Fund Performance

For the year ended December 31, 2024

Investment Objective and Strategy

The fundamental investment objective of **First Trust NASDAQ® Clean Edge® Green Energy ETF** (the “First Trust ETF”) is to replicate, to the extent possible, the performance of an index of U.S. listed companies designed to track the performance of clean energy companies engaged in manufacturing, development, distribution and installation of clean-energy technologies including, but not limited to, solar photovoltaics, wind power, advanced batteries, fuel cells, and electric vehicles, initially the NASDAQ® Clean Edge® Green Energy IndexSM.

The NASDAQ® Clean Edge® Green Energy IndexSM is a modified market capitalization weighted index designed to track the performance of clean energy companies that are publicly traded in the United States and includes companies engaged in manufacturing, development, distribution and installation of emerging clean-energy technologies including, but not limited to, solar photovoltaics, wind power, advanced batteries, fuel cells, and electric vehicles.

Risk

The First Trust ETF provides exposure to its index by investing all or substantially all of its assets in an underlying U.S. index fund known as First Trust NASDAQ® Clean Edge® Green Energy Index Fund (the “Underlying Fund”), which is managed by the First Trust ETF's portfolio advisor.

The risks associated with an investment in the First Trust ETF is discussed in the First Trust ETF's most recent prospectus.

Results of Operations

General

The First Trust ETF's net asset value as of December 31, 2024, was \$8,923,595 or \$15.93 per unit. The First Trust ETF's net asset value as of December 31, 2023, was \$9,530,594 or \$18.33 per unit.

For the year ended December 31, 2024, the First Trust ETF paid total cash distributions of \$0.1550 per unit. In addition, the First Trust ETF declared cash distributions of \$0.0200 per unit for record date of December 31, 2024, with payment date of January 8, 2025.

Investment Performance

For the year ended December 31, 2024, the First Trust ETF returned -12.13% compared to the S&P 500® Index (the “benchmark”) return of 36.36%. Unlike the benchmark, the First Trust ETF's return is net of fees and expenses.

The First Trust ETF's only holding, the Underlying Fund, held 52 equity securities as of December 31, 2024. The top ten equity holdings for the Underlying Fund accounted for 58.90% of the portfolio within the Underlying Fund.

The Underlying Fund significantly underperformed the benchmark during the year mostly due to stock selection within the Information Technology sector. Within Information Technology, large overweight allocations to ON Semiconductor Corporation and Enphase Energy, Inc. contributed significantly to the underperformance. No weight in NVIDIA Corporation also weighed on relative performance. An overweight position in the Semiconductors & Semiconductor Equipment industry mitigated the underperformance.

The Underlying Fund's top five stocks by contribution to return were Tesla, Inc., First Solar, Inc., Acuity Brands, Inc., Bloom Energy Corporation, and Itron, Inc. The Underlying Fund's bottom five stocks by contribution to return were Rivian Automotive, Inc., Enphase Energy, Inc., Albemarle Corporation, Wolfspeed, Inc., and SolarEdge Technologies, Inc.

The First Trust's ETF's exposure to the U.S. dollar contributed positively to its absolute performance during the year, as the U.S. dollar appreciated 8.96% against the Canadian dollar from December 29, 2023, to December 31, 2024.

First Trust NASDAQ® Clean Edge® Green Energy ETF

Management Report of Fund Performance

For the year ended December 31, 2024

Recent Developments

The clean energy industry underperformed the broader market in 2024. The First Trust ETF experienced broad-based weakness as only one of the seven GICS sector exposures in the portfolio had a positive return. The portfolio experienced the bulk of its loss in the first six months of 2024 falling 18.94%. In the back half of 2024 the portfolio experienced a 9 basis point return which was driven by a few holdings offsetting the losses of the majority. The primary driver behind the weak performance was that majority of the holdings would be considered “long duration equities” which essentially means the equities expect materially higher cashflow in the future leading to heightened interest rate sensitivity. The portfolio primarily contains securities which are domiciled in the United States thus interest rate movements in the U.S. Treasury market materially affects the holdings. In the beginning of 2024, the market was pricing in consistent rate cuts from the Federal Reserve (“Fed”), after inflation proved to be stickier than expected rate cuts were delayed to the fall which weighed on the portfolios performance. The Fed began cutting rates in September 2024 and the First Trust ETF saw improved performance leading up to the cut, the First Trust ETF then began to fall again as longer dated yields began to rise after markets feared the Fed prematurely cut rates. The portfolio regained losses following the presidential election to end the six months flat primarily due to idiosyncratic factors in a few holdings. Tesla Inc. in particular benefitted the First Trust ETF as CEO, Elon Musk, is seen as an ally of President Elect Donald Trump. Another example was Bloom Energy which experienced strong performance after its fuel cells were seen as a potential beneficiary of the strong electricity demand for artificial intelligence (“AI”) data centers. It should also be mentioned that the First Trust ETF has heavy exposure to solar infrastructure which faced two large setbacks last year. One, the election of Donald Trump is seen as a potential threat to government incentives in the Inflation Reduction Act which could delay the build out of solar infrastructure. And two, large information technology companies which are building AI data centers are exploring nuclear options for their clean energy needs. Overall, it appears clean energy, outside of nuclear, still sits out of favor among investors. Anticipating a shift in sentiment is difficult but tailwinds still exist for the space. Valuations remain low compared to relative history, renewables are still forecasted to be the fastest growing energy source in the world, and normalization of COVID-19 headwinds continue to roll off. Key risks in the near term include high financing costs, fiscal policy changes following the U.S. presidential election, additional tariffs on China, and margin compression due to lack of pricing power.

Related Party Transactions

FT Portfolios Canada Co. is the Manager of the First Trust ETF and is a Canadian affiliate of First Trust Advisors L.P., the investment advisor (the “Advisor”) of the First Trust ETF.

Pursuant to terms of the declaration of trust of the First Trust ETF, the Manager provides or arranges for all management, administrative and other services required by the First Trust ETF. The Manager receives a management fee from the First Trust ETF. For further details, please see “Management Fees”.

The Manager has retained the Advisor to provide certain services to the First Trust ETF pursuant to an investment advisory agreement. The Advisor receives advisory fees from the Manager out of the management fee.

(a) For the years prior to February 17, 2021, represent returns for the First Trust ETF based on the First Trust ETF's investment objective prior to the change in investment objective which occurred on February 17, 2021.

(1) This information is provided as at December 31 of the years shown and is prepared under IFRS® Accounting Standards as issued by the International Accounting Standards Board ("IASB").

(2) Net asset value and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the year.

(3) Distributions were paid in cash or reinvested in additional units of the First Trust ETF, or both. Non-cash distributions are reinvested in additional units of the First Trust ETF and subsequently consolidated. Neither the number of units held by the unitholder, nor the net asset per unit of the First Trust ETF change as a result of any non-cash distributions.

(4) This table is not intended to be a reconciliation of beginning to ending net asset value per unit.

Ratios and Supplemental Data

QCLN	2024	2023	2022	2021 ^(a)	2020
Net asset value (000's)	\$8,924	\$9,531	\$11,534	\$17,195	\$4,700
Number of units outstanding	560,000	520,000	550,000	610,000	150,000
Management expense ratio ⁽¹⁾	0.75%	0.74%	0.74%	0.77%	0.79%
Management expense ratio before waivers or absorption	0.77%	0.76%	0.76%	0.78%	0.81%
Trading expense ratio ⁽²⁾	0.00%	0.00%	0.00%	0.02%	0.10%
Portfolio turnover rate ⁽³⁾	24.52%	20.68%	39.96%	81.09%	210.55%

(a) For the years prior to February 17, 2021, represent returns for the First Trust ETF based on the First Trust ETF's investment objective prior to the change in investment objective which occurred on February 17, 2021.

(1) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated year, including the First Trust ETF's proportionate share of the MER of the Underlying Fund in which the First Trust ETF has invested, and is expressed as an annualized percentage of daily average net asset value during the year.

(2) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the year. This includes the First Trust ETF's proportionate share of the commissions of Underlying Fund in which the First Trust ETF has invested.

(3) The First Trust ETF's portfolio turnover rate indicates how actively the First Trust ETF's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the First Trust ETF buying and selling all of the securities in its portfolio once in the course of the year. The higher a First Trust ETF's portfolio turnover rate in a year, the greater the trading cost payable by the First Trust ETF in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between high turnover rate and the performance of a First Trust ETF.

Management Report of Fund Performance

For the year ended December 31, 2024

Management Fees

The First Trust ETF will pay the Manager a management fee of 0.15% based on the average daily NAV of the First Trust ETF. The management fee, plus applicable taxes including HST, will be accrued daily and paid monthly in arrears. The Manager may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time.

The First Trust ETF's management fee will also bear the management fee of the Underlying Fund.

Past Performance

General

The past performance information shown assumes that all distributions made by the First Trust ETF in the years shown were reinvested in additional securities of the First Trust ETF. The performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the First Trust ETF has performed in the past does not necessarily indicate how it will perform in the future.

Year by Year Returns

The bar chart below shows the First Trust ETF's performance for the years ended December 31 and illustrates how the investment fund's performance has changed from year to year. The chart also shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year.

**For the years prior to February 17, 2021, represent returns for the First Trust ETF based on the First Trust ETF's investment objective prior to the change in investment objective which occurred on February 17, 2021.*
