¹ As of December 31, 2025 audited annual financial statements and MRP.

² Distribution rate is calculated by dividing the most recent annualized distribution paid or declared by the Net Asset Value. Distribution rates may vary. The distributed amount may include return of capital (ROC) from time to time.

³ The weighted average effective duration is a measure of the bond portfolio's price sensitivity to changes in interest rates. Bond portfolios with longer durations are more sensitive to changes in interest rates than securities of shorter durations.

**Percentage of net asset value may not equal 100%

Investment Objective

First Trust JFL Fixed Income Core Plus ETF (the "First Trust ETF") seeks to provide unitholders with income and preserve capital by investing at least 75% of the fund's net assets in a diversified portfolio of investment grade Canadian corporate, federal, provincial and municipal bonds. The First Trust ETF may also invest up to 25% of the fund's net assets in non-investment grade corporate bonds (at the time of purchase, as rated by a designated rating organization), high yield bonds, developed international bonds, emerging market bonds, preferred shares and convertible bonds of North American and/or international issuers.

Why Invest In This Strategy?

Active portfolio management, which includes quality access to inventory and pricing

Stable Income

- Income derived from domestic and international quality fixed income securities.
- Yield enhancement from opportunistic exposure to higher-yielding securities such as preferred shares, global bonds, and high yield bonds.

Fundamental Strength

- Corporate issuers have to meet stringent fundamental analysis, helping to minimize overall risk.
- Sustainable Investing considerations, including integration of the analysis of relevant ESG factors into investment decisions.

Risk rating

FT Portfolios Canada Co. has rated the volatility of this ETF as **low**. This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF's returns, see the Risk section of the ETF's prospectus.

FTA has approximately US \$342.87 billion in total assets under supervision or management.

⁴ A credit rating is an assessment provided by a nationally recognized statistical rating organization (NRSRO) of the creditworthiness of an issuer with respect to debt obligations except for those debt obligations that are only privately rated. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest). Investment grade is defined as those issuers that have a long-term credit rating of BBB- or higher. "NR" indicates no rating. The credit ratings shown relate to the credit worthiness of the issuers of the underlying securities in the Fund, and not to the Fund or its shares. Credit ratings are subject to change.

Commissions, management fees and expenses all may be associated with ETF investments. Please read the prospectus before investing. The indicated rates of return are the historical annual compound total returns including changes in the unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by the unitholder that would have reduced returns. ETFs are not guaranteed, their values change frequently and past performance may not be repeated.
