This annual management report of fund performance contains financial highlights but does not contain the complete audited annual financial statements of the First Trust ETF. All references to dollars contained herein are to Canadian dollars.

Securityholders may also contact us to request a copy of the First Trust ETF’s proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosures relating to the First Trust ETF by calling 1-877-622-5552, by writing to us at FT Portfolios Canada Co., 40 King Street West, Suite 5102, Scotia Plaza, Box 312, Toronto, Ontario M5H 3Y2 or by visiting our website at [www.firsttrust.ca](http://www.firsttrust.ca) or SEDAR at [www.sedar.com](http://www.sedar.com).

### **Forward-looking Statements**

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts but instead represent beliefs regarding future events. By their nature, forward-looking statements are based on assumptions and are subject to inherent risks and uncertainties. There is significant risk that forward-looking statements will not prove to be accurate. Readers of this document should not place undue reliance on forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the expectations, estimates or intentions expressed or implied in the forward-looking statements. These factors include but are not limited to market and general economic conditions, interest rates, foreign currency exchange rates, the extent of industry sector exposure, the performance of the securities of the issuers held in the portfolio and regulatory developments and the risks detailed in the First Trust ETF’s prospectus. The Manager does not undertake and specifically disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

## **Investment Objective and Strategy**

The fundamental investment objective of **First Trust Cloud Computing ETF** (the “First Trust ETF”) is to replicate, to the extent possible, the performance of an index of U.S. companies involved in the cloud computing industry, initially the ISE CTA Cloud Computing Index™.

The ISE CTA Cloud Computing Index™ is a modified equal weighted index designed to track the performance of companies involved in the cloud computing industry. To be included in the index, a security must be classified as a Cloud Computing company by the Consumer Technology Association.

## **Risk**

The First Trust ETF provides exposure to its new index by investing all or substantially all of its assets in an underlying U.S. index fund known as First Trust Cloud Computing ETF (the “Underlying Fund”), which is managed by the First Trust ETF's portfolio advisor.

The risks associated with an investment in the First Trust ETF is discussed in the First Trust ETF's most recent prospectus.

## **Results of Operations**

### **General**

The First Trust ETF's net asset value as of December 31, 2022 was \$2,064,161 or \$13.76 per unit. The First Trust ETF's net asset value as of December 31, 2021 was \$4,475,026 or \$23.55 per unit.

For the year ended December 31, 2022, the First Trust ETF paid total cash distributions per unit of \$0.4399.

### **Investment Performance**

For the year ended December 31, 2022, the First Trust ETF returned -40.87% compared to the S&P 500® Index (the “benchmark”) return of -12.16%. Unlike the benchmark, the First Trust ETF's return is net of fees and expenses.

The First Trust ETF's only holding, the Underlying Fund, held 67 equity securities as of December 31, 2022. The top ten equity holdings for the Underlying Fund accounted for 36.22% of the portfolio within the Underlying Fund.

The Underlying Fund underperformed the benchmark during the year due to both an overweight position and stock selection in Information Technology. The Underlying Fund was significantly overweight Information Technology, which struggled during the year as negative macroeconomic sentiment from rising interest rates, persistent inflation, and weakening demand soured the near-term growth outlook for the sector. The underperformance was mitigated by an underweight allocation within Communication Services and Consumer Discretionary.

The Underlying Fund's top five stocks by contribution to return were International Business Machines Corporation, Anaplan, Inc., Citrix Systems, Inc., Hewlett Packard Enterprise Company, and Box, Inc. The bottom five stocks by contribution to return were Rackspace Technology, Inc., DigitalOcean Holdings, Inc., MongoDB, Inc., Twilio Inc., and RingCentral, Inc.

The First Trust's ETF's exposure to the U.S. dollar contributed positively to its absolute performance during the year as the U.S. dollar appreciated 6.96% against the Canadian dollar from December 31, 2021 to December 31, 2022.

## **Recent Developments**

As computer networks continue to mature and new communication technology transforms how the internet can be utilized, “The Cloud” has emerged as a highly efficient highly scalable set of hardware and software services. Largely, until the 1990's, network speeds were not sufficient to support remote compute and most all software and programs were run on local devices. As better communication technology has allowed for faster interactions between devices and networks, the cloud has emerged as a preferred format for utilizing hardware and software services, servers, storage, networks, applications and more. A key feature for cloud services is scalability, the ability to ramp

up workloads and storage immediately. The advent of cloud-based solutions has led to a rapid emergence of new software, infrastructure, and cloud platform companies. These businesses are exemplified by rapid scalability and 'as-a-service' models. The benefits of cloud-based offerings include low-cost, rapid scalability, reliability, and more secure IT environments. Cloud computing focused companies are well positioned to benefit from the associated changes in IT spending. Technology stocks were strong relative performers for nearly eight years into 2022. However, the combination of inflation and higher interest rates resulted in more demanding market conditions that impacted unprofitable technology stocks the hardest. The drop in valuations reflects a change in investor sentiment which has gone from favoring growth at any cost to growth funded from organically generated cash flows. While valuations have come down, they remain elevated. We have a favorable view of software companies which exhibit high operational leverage, strong secular growth and generally high cash generation in mature companies. Technology companies are acknowledging the changing market conditions to focus on cost reductions and growth at reasonable, versus any, cost. Trends to look out for continue to be the introduction of Web 3.0, new use cases for ever better artificial intelligence, white collar job automation, and ongoing debates over privacy and data collection.

### **Related Party Transactions**

(a) Effective February 17, 2021, the First Trust ETF is fully invested in the Underlying Fund.

(1) This information is provided as at December 31 of the years shown and is prepared under IFRS.

(2) Net asset value and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the year.

(3) Distributions were paid in cash or reinvested in additional units of the First Trust ETF, or both. Non-cash distributions are reinvested in additional units of the First Trust ETF and subsequently consolidated. Neither the number of units held by the unitholder, nor the net asset per unit of the First Trust ETF change as a result of any non-cash distributions.

(4) This table is not intended to be a reconciliation of beginning to ending net asset value per unit.

### Ratios and Supplemental Data

SKYY	2022	2021 <sup>(a)</sup>	2020	2019	2018
Net asset value (000's)	\$2,064	\$4,475	\$1,256	\$2,617	\$2,527
Number of units outstanding	150,000	190,000	50,000	100,000	100,000
Management expense ratio <sup>(1)</sup>	0.76%	0.77%	0.76%	0.77%	0.78%
Management expense ratio before waivers or absorption	0.78%	0.78%	0.79%	0.79%	0.79%
Trading expense ratio <sup>(2)</sup>	0.00%	0.02%	0.05%	0.04%	0.04%
Portfolio turnover rate <sup>(3)</sup>	51.44%	82.22%	94.18%	107.01%	60.16%

(a) Effective February 17, 2021, the First Trust ETF is fully invested in the Underlying Fund.

(1) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated year, including the First Trust ETF's proportionate share of the MER of the Underlying Fund in which the First Trust ETF has invested, and is expressed as an annualized percentage of daily average net asset value during the year.

(2) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the year. This includes the First Trust ETF's proportionate share of the commissions of Underlying Fund in which the First Trust ETF has invested.

(3) The First Trust ETF's portfolio turnover rate indicates how actively the First Trust ETF's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the First Trust ETF buying and selling all of the securities in its portfolio once in the course of the year. The higher a First Trust ETF's portfolio turnover rate in a year, the greater the trading cost payable by the First Trust ETF in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between high turnover rate and the performance of a First Trust ETF.
