#### **Forward Looking Statements**

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts but instead represent beliefs regarding future events. By their nature, forward-looking statements are based on assumptions and are subject to inherent risks and uncertainties. There is significant risk that forward-looking statements will not prove to be accurate. Readers of this document should not place undue reliance on forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the expectations, estimates or intentions expressed or implied in the forward-looking statements. These factors include but are not limited to market and general economic conditions, interest rates, foreign currency exchange rates, the extent of industry sector exposure, the performance of the securities of the issuers held in the portfolio and regulatory developments and the risks detailed in the First Trust ETF’s prospectus. The Manager does not undertake and specifically disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

#### **Investment Objective and Strategy**

The fundamental investment objective of **First Trust AlphaDEX™ European Dividend Index ETF (CAD-Hedged)** (the “First Trust ETF”) is to replicate, to the extent possible, the performance of the AlphaDEX™ European Dividend Index (the “Index”), net of expenses. The AlphaDEX™ European Dividend Index results from applying the AlphaDEX™ methodology to a universe of ADRs of European companies that are listed on the NYSE, NYSE Market and NASDAQ exchanges.

The investment strategy of the First Trust ETF is to invest in and hold a proportionate share of the constituent securities of the Index, or other securities, to seek to replicate the performance of the Index. The Index seeks to provide a risk managed, global income portfolio which generates a high yield for the risk taken and consists of liquid income-bearing exchange traded funds and other exchange traded products across various asset classes. The First Trust ETF may also hold cash and cash equivalents or other money market instruments to fund current liabilities.

The Manager may use a sampling methodology in selecting investments for the First Trust ETF. As an alternative or in conjunction with investing in and holding constituent securities, the First Trust ETF may also invest in other securities to obtain exposure to the constituent securities of the applicable Index in a manner that is consistent with the investment objective and investment strategy of the First Trust ETF.

#### **Risk**

The portfolio held 40 equity securities at the end of the reporting period. The top ten equity holdings accounted for 40.35% of the portfolio. Financials, Energy, and Information Technology were the top three sector weightings at the beginning of the reporting period. At the end of the period, the top sector weightings remained the same. The AlphaDEX™ stock selection process is a rules-based process and can result in sector weightings that differ from that of the benchmark. The First Trust ETF invests in a base universe of stocks that pay dividends. The ability of the underlying stocks to pay a dividend in the future is dependent on factors that are not controlled by fund management. A security held in the First Trust ETF may, at any time, decide to cut or eliminate its dividend payment. At the end of the period Energy, Information Technology, and Telecommunication Services holdings were the most overweight positions relative to the benchmark. Industrials, Consumer Staples, and Consumer Discretionary were the most underweight sectors relative to the benchmark at the end of the period. At the beginning of the period, the top three overweight sectors were Information Technology, Energy, and Telecommunication Services. The most underweight sectors at the beginning of the period were Consumer Staples, Consumer Discretionary, and Industrials. Given the First Trust ETF employs a currency hedging strategy (GBP/CAD, EUR/CAD, CHF/CAD) to minimize the impact of changes in the exchange rates of hedged currencies, and considering that the portfolio continues to seek to replicate the AlphaDEX™ European Dividend Index, we conclude there was no material change to the risk profile of the First Trust ETF.

#### **Results of Operations**

##### **General**

The First Trust ETF’s total net asset value as of June 30, 2018 was \$23,365,161 or \$23.36 per Common Class unit (“EUR”) and \$23.38 per Advisor Class unit (“EUR.A”). The First Trust ETF’s total net asset value as of December 31, 2017 was \$26,827,167 or \$23.33 per EUR and \$23.34 per EUR.A.

For the six-month period ended June 30, 2018, the First Trust ETF paid total cash distributions per unit of 0.3300 for EUR and \$0.2012 for EUR.A. In addition, the First Trust ETF declared cash distributions per unit of \$0.0500 for EUR and \$0.0288 for EUR.A for record date June 29, 2018 and payment date of July 9, 2018.

##### **Investment Performance**

EUR units returned 1.50% and EUR.A returned 0.94% for the six-month period ended June 30, 2018. This compares with the MSCI Europe Index in local currency (the “benchmark”) return of -0.45%. Unlike the benchmark, the First Trust ETF’s returns are net of fees and expenses.

## Management Report of Fund Performance

### For the six-month period ended June 30, 2018

---

The First Trust ETF outperformed due to overweight positions in the Energy and Information Technology sectors which were the two best performing sectors during the period. The First Trust ETF also benefited from strong selection in the Information Technology sector. The First Trust ETF's outperformance was mitigated by poor selection in the Financials sector.

The top five stocks by contribution to return were BHP Billiton Plc Sponsored ADR, ASML Holding NV ADR, Eni S.p.A. Sponsored ADR, Total SA Sponsored ADR Class B, and Equinor ASA Sponsored ADR. The bottom five stocks by contribution to return were Banco Santander S.A. Sponsored ADR, BT Group PLC Sponsored ADR, VEON Ltd. Sponsored ADR, ArcelorMittal SA ADR, and Deutsche Bank AG.

The currency hedging strategy was unfavorable to the First Trust ETF as the US dollar, euro, Swiss franc, and British pound all appreciated versus the Canadian dollar during the period.

### **Recent Developments**

During the period, the First Trust ETF added 10 positions and removed 12 positions. The changes were made by applying the quantitative AlphaDEX™ selection methodology to a universe of European market dividend paying stocks.

The First Trust ETF benefitted from rising oil prices during the period as it held a large overweight position in the sector. Oil prices rose during the period due in large part to falling inventories as a result of a 2016 OPEC agreement to curb production and strong global demand. Meanwhile, investors fear that Europe is particularly vulnerable to a trade war between the United States and China, which are Europe's two largest export markets. The dividend yield on the MSCI Europe Index, the broad benchmark, increased during the first half of the year.

### **Related Party Transactions**

(1) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period/year and is expressed as an annualized percentage of daily average net asset value during the period/year.

(2) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period/year.

(3) The First Trust ETF's portfolio turnover rate indicates how actively the First Trust ETF's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the First Trust ETF buying and selling all of the securities in its portfolio once in the course of the period/year. The higher a First Trust ETF's portfolio turnover rate in a period/year, the greater the trading cost payable by the First Trust ETF in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between high turnover rate and the performance of a First Trust ETF.

**Management Fees**

The First Trust ETF will pay the Manager a management fee of 0.60% and, in respect of the EUR.A, an additional amount for a service fee (see "EUR.A Service Fee" below) based on the average daily NAV of the First Trust ETF. The management fee, plus applicable taxes including HST, will be accrued daily and paid monthly in arrears. The Manager may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time.

**EUR.A Service Fee**

The Manager pays registered dealers a service fee equal to 1.00% per annum of the NAV of the Units held by clients of the registered dealer, plus any applicable taxes. The service fee will be calculated and accrued daily and paid quarterly at the end of each calendar quarter.
