Forward-looking Statements

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts but instead represent beliefs regarding future events. By their nature, forward-looking statements are based on assumptions and are subject to inherent risks and uncertainties. There is significant risk that forward-looking statements will not prove to be accurate. Readers of this document should not place undue reliance on forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the expectations, estimates or intentions expressed or implied in the forward-looking statements. These factors include but are not limited to market and general economic conditions, interest rates, foreign currency exchange rates, the extent of industry sector exposure, the performance of the securities of the issuers held in the portfolio and regulatory developments and the risks detailed in the First Trust ETF’s prospectus. The Manager does not undertake and specifically disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Investment Objective and Strategy

The fundamental investment objective of **First Trust Indxx NextG ETF** (the “First Trust ETF”) is to replicate, to the extent possible, the performance of an index of U.S. companies that have devoted or have committed to devote, material resources to the research, development and application of fifth generation and next generation digital cellular technologies as they emerge, initially the Indxx 5G & NextG Thematic IndexSM.

The Indxx 5G & NextG Thematic IndexSM is designed to track the performance of companies that have devoted, or have committed to devote, material resources to the research, development and application of fifth generation and next generation digital cellular technologies as they emerge. Eligible securities must have a minimum market capitalization of US\$500 million, six-month average daily trading volume of at least US\$2 million (US\$1 million for emerging market companies), traded for at least 90% of the total trading days in the last six months or for a security recently issued in an initial public offering over the prior three months, a minimum free float of 10% of shares outstanding and a share price of less than US\$10,000 for new index constituents.

Risk

The First Trust ETF provides exposure to its new index by investing all or substantially all of its assets in an underlying U.S. index fund known as First Trust Indxx NextG ETF (the “Underlying Fund”), which is managed by the First Trust ETF’s portfolio advisor.

The risks associated with an investment in the First Trust ETF is discussed in the First Trust ETF’s most recent prospectus.

Results of Operations

General

The First Trust ETF’s net asset value as of June 30, 2022 was \$1,716,063 or \$7.80 per unit. The First Trust ETF’s net asset value as of December 31, 2021 was \$2,438,320 or \$9.75 per unit.

There were no cash distributions paid nor declared for the six-month period ended June 30, 2022.

Investment Performance

For the six-month period ended June 30, 2022, the First Trust ETF returned -20.02% compared to the MSCI ACWI Information Technology Index (the “benchmark”) return of -28.49%. Unlike the benchmark, the First Trust ETF’s return is net of fees and expenses.

The First Trust ETF’s only holding, the Underlying Fund, held 101 equity securities as of June 30, 2022. The top ten equity holdings for the Underlying Fund accounted for 13.82% of the portfolio within the Underlying Fund.

The Underlying Fund outperformed the benchmark during the period mostly due to an overweight allocation to Communication Services and stock selection within Information Technology. The benchmark was almost entirely allocated to Information Technology, which was one of the worst performing sectors during the period. As such, almost all of the Underlying Fund’s allocation to other sectors provided positive contribution to relative performance. The biggest drag on performance came from the appreciation of the U.S Dollar. Currency effects partially offset outperformance as the U.S. dollar appreciated significantly relative to leading global currencies during the period.

The Underlying Fund’s top five stocks by contribution to return were China Tower Corporation Limited, Amdocs Limited, International Business Machines Corporation, Telefonica, S.A., and Ooredoo Q.P.S.C. The bottom five stocks by contribution to return were Advanced Micro Devices, Inc., Tech Mahindra Limited, MediaTek Inc., Marvell Technology, Inc., and LG Electronics Inc.

Recent Developments

The proliferation of 5G, the next-generation wireless network, is underway and offers investors attractive investment opportunities. Where previous generations of networks enabled the advent of modern applications used in consumer-facing smart phones, the power of 5G will cast across multiple end markets including industrial automation, health care, and smart cities. In the near-term, the inception of 5G has catalyzed a massive communication service provider (CSP) capex cycle. CSPs are expected to accelerate capex to \$39 billion in 2022 and maintain capex spend around \$35 billion through at least 2025. This is a large step-up in spend relative to 4G cycle investments in the mid-\$20 billion range. Longer-term, 5G-enabled sales are expected to reach \$13.1 trillion by 2035 which creates an enticing growth opportunity for companies supporting 5G's development. 5G networking and the industries that support new connected devices remain an attractive theme as 5G investments, devices, and applications accelerate over the next several years.

(a) Effective February 17, 2021, the First Trust ETF is fully invested in the Underlying Fund.

(1) This information is provided as at June 30, 2022 and December 31 of the years shown and is prepared under IFRS.

(2) Net asset value and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the period/year.

(3) Distributions were paid in cash or reinvested in additional units of the First Trust ETF, or both. Non-cash distributions are reinvested in additional units of the First Trust ETF and subsequently consolidated. Neither the number of units held by the unitholder, nor the net asset per unit of the First Trust ETF change as a result of any non-cash distributions.

(4) This table is not intended to be a reconciliation of beginning to ending net asset value per unit.

(a) Effective February 17, 2021, the First Trust ETF is fully invested in the Underlying Fund.

(1) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period/year, including the First Trust ETF's proportionate share of the MER of the Underlying Fund in which the First Trust ETF has invested, and is expressed as an annualized percentage of daily average net asset value during the period/year.

(2) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period/year. This includes the First Trust ETF's proportionate share of the commissions of Underlying Fund in which the First Trust ETF has invested.

(3) The First Trust ETF's portfolio turnover rate indicates how actively the First Trust ETF's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the First Trust ETF buying and selling all of the securities in its portfolio once in the course of the period/year. The higher a First Trust ETF's portfolio turnover rate in a period/year, the greater the trading cost payable by the First Trust ETF in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between high turnover rate and the performance of a First Trust ETF.

Management Fees

The First Trust ETF will pay the Manager a management fee of 0.15% based on the average daily NAV of the First Trust ETF. The management fee, plus applicable taxes including HST, will be accrued daily and paid monthly in arrears. The Manager may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time.

The First Trust ETF will bear the Underlying Fund's management fee of 0.70% per annum on average daily net assets on the First Trust ETF's portfolio assets invested in the Underlying Fund. Accordingly, the management fee cost to unitholders of their investment will be 0.85% per annum of NAV of the First Trust ETF plus applicable taxes.

Past Performance

General

The past performance information shown assumes that all distributions made by the First Trust ETF in the period/years shown were reinvested in additional securities of the First Trust ETF. The performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the First Trust ETF has performed in the past does not necessarily indicate how it will perform in the future.
