INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE

June 30, 2017

First Trust AlphaDEX™ U.S. Dividend ETF (CAD-Hedged) (the “First Trust ETF”)

This interim management report of fund performance contains financial highlights, but does not contain the complete unaudited interim financial report of the First Trust ETF. All references to dollars contained herein are to Canadian dollars.

Securityholders may also contact us to request a copy of the First Trust ETF’s proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosures relating to the First Trust ETF by calling 1-877-622-5552, by writing to us at FT Portfolios Canada Co., 40 King Street West, Suite 3001, Scotia Plaza, Box 312, Toronto, Ontario M5H 3Y2 or by visiting our web site at www.firsttrust.ca or SEDAR at www.sedar.com.

Forward Looking Statements

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts but instead represent beliefs regarding future events. By their nature, forward-looking statements are based on assumptions and are subject to inherent risks and uncertainties. There is significant risk that forward-looking statements will not prove to be accurate. Readers of this document should not place undue reliance on forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the expectations, estimates or intentions expressed or implied in the forward-looking statements. These factors include but are not limited to market and general economic conditions, interest rates, foreign currency exchange rates, the extent of industry sector exposure, the performance of the securities of the issuers held in the portfolio and regulatory developments and the risks detailed in the First Trust ETF’s prospectus. The Manager does not undertake and specifically disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

First Trust AlphaDEX™ U.S. Dividend ETF (CAD-Hedged)

Management Report of Fund Performance

For the period ended June 30, 2017

Investment Objective and Strategy

The fundamental investment objective of **First Trust AlphaDEX™ U.S. Dividend ETF (CAD-Hedged)** (the “First Trust ETF”) is to provide unitholders with exposure to the performance of a portfolio of higher yielding U.S. dividend paying stocks, as well as providing unitholders with monthly distributions. The First Trust ETF will primarily invest in U.S. dividend paying equities.

To achieve its investment objectives, the First Trust ETF will primarily invest in U.S. dividend paying equities. The portfolio advisor will select securities from a universe of U.S. companies whose dividend yield is greater than or equal to the median dividend yield of all members of the S&P 500 Index. Securities will also be subject to an initial screening process to ensure sufficient liquidity (minimum three month average daily trading volume of \$5 million), market capitalization (minimum of \$200 million) and price per security (minimum of \$2). Eligible companies will then be assigned a score and ranked based on the AlphaDEX™ selection methodology which is a rules based methodology that analyzes companies based on five growth factors consisting of three, six and twelve month price appreciation, one year sales growth and sales-price ratio and three value factors consisting of book value-to-price ratio, cash flow-to-price ratio and return on assets. The top 75% of the eligible companies will comprise the portfolio, subject to sector limits. The portfolio will be broadly diversified by sector, with no sector representing greater than 15% above the benchmark weight at the time of each semi-annual rebalance and reconstitution of the portfolio. The resulting stocks are not weighted based on market capitalization, but on the basis of potential investment merit. The selected stocks are then divided equally into quintiles based on their AlphaDEX™ methodology scores; the higher scoring quintiles are given a greater weight than lower scoring quintiles. The top ranked quintile receives a top weight of 5/15 (33.3%) of the portfolio with successive quintiles receiving 4/15 (26.7%), 3/15 (20.0%), 2/15 (13.3%) and 1/15 (6.7%). The First Trust ETF will generally seek to hedge substantially all of its exposure to the U.S. dollar back to the Canadian dollar.

The First Trust ETF will rebalance and reconstitute the portfolio of constituent securities semi-annually. Between rebalancing dates, the allocation between each of the constituent securities will change due to market movement and the portfolio advisor will typically not reallocate, include or exclude issuers from the First Trust ETF portfolio until its next rebalance date.

There are two classes of units offered by the First Trust ETF:

- Common Class (TSX symbol: FUD)
- Advisor Class (TSX symbol: FUD.A)

The inception date of the First Trust ETF was May 15, 2013.

Risk

The portfolio held 189 equity securities at the end of the reporting period. The top ten equity holdings accounted for 9.55% of the portfolio. Financials, Consumer Discretionary, and Information Technology were the top three sector weightings at the beginning of the period. At the end of the period, the top three sector weights were Consumer Discretionary, Financials, and Utilities. The sector weighting changes were a result of applying the AlphaDEX™ stock selection process at the semi-annual rebalance, and not a material change in benchmark composition. The AlphaDEX™ stock selection methodology is a rules-based process and can result in sector weightings that differ from that of the benchmark. The First Trust ETF uses a base universe of U.S. stocks that pay dividends. The ability of a company to pay a dividend in the future is dependent on factors that are not controlled by fund management. A company held in the fund may, at any time, decide to cut or eliminate its dividend payment. During the first half of the year The First Trust ETF added 39 stocks and removed 39 stocks. The most overweight sectors at the end of the period were Utilities, Consumer Discretionary, and Real Estate. The most underweight sectors at the end of the period were Health Care, Information Technology, and Consumer Staples. At the beginning of the period, the most overweight sectors were Utilities, Financials, and Consumer Discretionary. The most underweight sectors at the beginning of the period were Health Care, Information Technology, and Consumer Staples. Given the First Trust ETF employs a currency hedging strategy to minimize the impact of changes in the USD-CAD exchange rate, and considering that the portfolio remains consistent in its application of the AlphaDEX™ stock selection methodology to pick equities for the portfolio, we conclude there was no material change to the risk profile of the First Trust ETF.

First Trust AlphaDEX™ U.S. Dividend ETF (CAD-Hedged)

Management Report of Fund Performance

For the period ended June 30, 2017

Results of Operations

The First Trust ETF's total net asset value as of June 30, 2017 was \$7,659,431 or \$25.54 per Common Class unit and \$25.50 per Advisor Class unit. The First Trust ETF's total net asset value as of December 31, 2016 was \$8,534,880 or \$24.39 per Common Class unit and \$24.35 per Advisor Class unit.

For the period ended June 30, 2017, the First Trust ETF paid cash distributions per unit as follows:

<u>Payment Date</u>	<u>FUD</u>	<u>FUD.A</u>
January 9 th	\$0.0924	\$0.0690
February 7 th	\$0.0484	\$0.0252
March 7 th	\$0.0484	\$0.0248
April 7 th	\$0.0505	\$0.0265
May 5 th	\$0.0500	\$0.0265
June 7 th	\$0.0525	\$0.0287

For the period ended June 30, 2017, the First Trust ETF declared cash distributions per unit of \$0.0625 for FUD and \$0.0381 for FUD.A with payment date of July 10, 2017.

Investment Performance

The First Trust ETF's Common Class units returned 6.00% and the Advisor Class units returned 5.42%, net of fees and expenses, for the semi-annual period ended June 30, 2017. This compares with the primary and secondary benchmarks, S&P 500 Index (CAD-Hedged) total return of 9.08% and S&P High Yield Dividend Aristocrats Index Total Return (CAD-Hedged) total return of 5.14%. Energy was the best performing sector relative to the benchmark. The sector was the worst performing group in the S&P 500, but an underweight position and stock selection boosted performance in the fund. Industrials were an overweight position versus the benchmark. The sector added to relative performance with a positive selection effect. Information Technology holdings lagged the benchmark on a relative basis as the sector was underweight and had a negative selection effect. Health Care, Real Estate, and Financials also detracted from relative performance during the first half of the year.

The top five stocks by contribution to return were Royal Caribbean Cruises Ltd., Wynn Resorts, Limited, CSX Corporation, Microchip Technology Incorporated, and Western Digital Corporation. The bottom five stocks by contribution to return were Macerich Company, Macy's Inc, Kohl's Corporation, Target Corporation, and Frontier Communications Corporation Class B.

During the period, appreciation in the US dollar versus the Canadian dollar was advantageous for the First Trust ETF given the currency hedge.

Recent Developments

The First Trust ETF added 39 stocks and removed 39 stocks in early June in conjunction with the semi-annual rebalance. The changes were made by applying the AlphaDEX™ selection methodology to a universe of U.S. dividend paying stocks. The universe of dividend paying stocks was relatively stable over the period.

Larger cap stocks outperformed smaller stocks in the US during the first half of the year as investors look for less volatile stocks with growth potential. Information technology stocks continue to be a targeted sector as technology creeps into our everyday lives. The Federal Reserve is keeping a close eye on inflation and the labor markets going in to the second half of the year. The Fed is looking to raise interest rates one or two times before 2018.

(a) December 31, 2013 does not relate to the full year as the date of inception of the First Trust ETF was May 15, 2013.

(b) Initial offering price

(1) This information is provided as at December 31 and June 30 of the years/periods shown and is prepared under IFRS.

(2) Net asset value and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the period/year.

(3) Distributions were either paid in cash or reinvested in additional units of the First Trust ETF.

(4) This table is not intended to be a reconciliation of beginning to ending net asset value per unit.

Ratios and Supplemental Data – FUD

	Jun. 30, 2017	Dec. 31, 2016	Dec. 31, 2015	Dec. 31, 2014	Dec. 31, 2013
Net asset value (000's)	\$6,401	\$7,334	\$9,798	\$13,590	\$5,698
Number of units outstanding	250,663	300,663	450,000	550,000	250,000
Management expense ratio ⁽¹⁾	0.66%	0.66%	0.67%	0.67%	0.64%
Management expense ratio before waivers or absorption	0.68%	0.68%	0.69%	0.69%	0.64%
Trading expense ratio ⁽²⁾	0.04%	0.07%	0.06%	0.07%	0.06%
Portfolio turnover rate ⁽³⁾	51.94%	174.98%	154.98%	148.49%	77.46%
Net asset value per unit	\$25.54	\$24.39	\$21.77	\$24.71	\$22.79

(1) Management expense ratio is based on total expenses for the stated period and is expressed as an annualized percentage of daily average net asset value during the period/year.

(2) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period/year.

(3) The First Trust ETF's portfolio turnover rate indicates how actively the First Trust ETF's Portfolio Advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the First Trust ETF buying and selling all of the securities in its portfolio once in the course of the period/year. The higher a First Trust ETF's portfolio turnover rate in a period/year, the greater the trading cost payable by the First Trust ETF in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between high turnover rate and the performance of a First Trust ETF.

Management Report of Fund Performance

For the period ended June 30, 2017

Management Fees

The First Trust ETF will pay the Manager a management fee equal to 0.60% and, in respect of the FUD.A, an additional amount for a service fee (see “FUD.A Service Fee” below) based on the average daily NAV of the First Trust ETF. The management fee, plus applicable taxes including HST, will be accrued daily and paid monthly in arrears. The Manager may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time.

FUD.A Service Fee

The Manager pays registered dealers a service fee equal to 1.00% per annum of the NAV held by clients of the registered dealer, plus any applicable taxes. The service fee will be calculated and accrued daily and paid quarterly at the end of each calendar quarter.

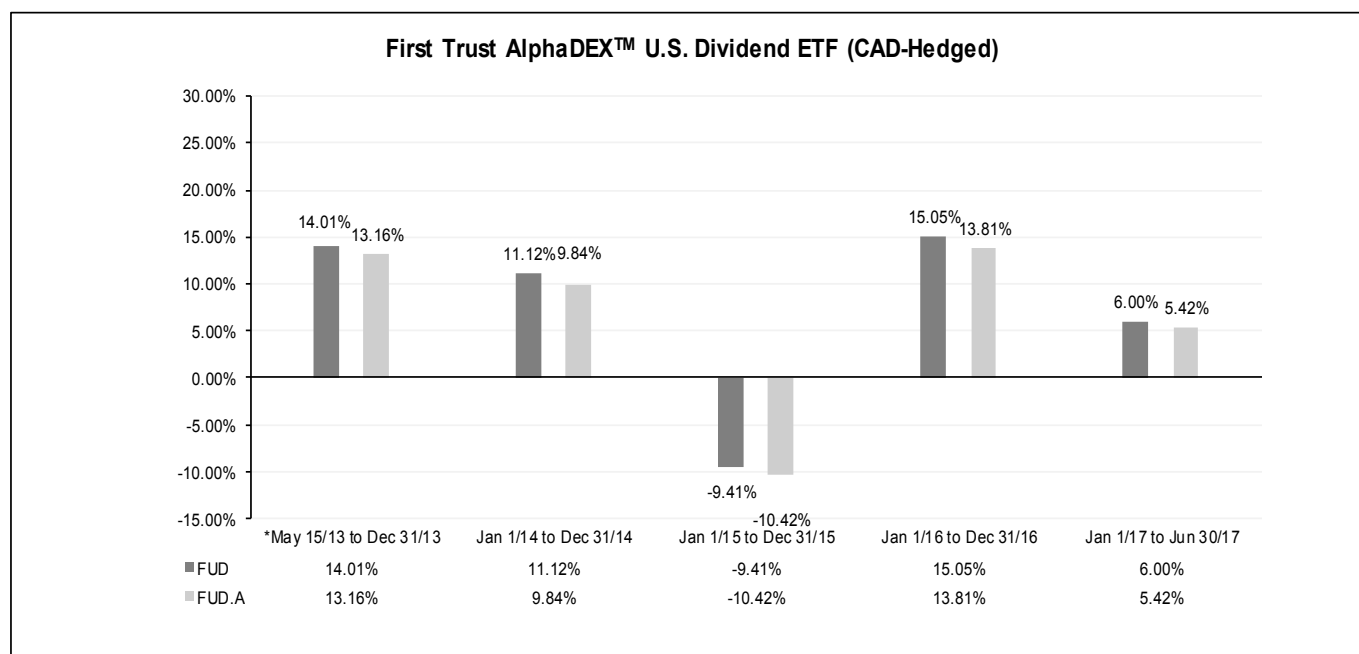

Past Performance

General

The past performance information shown assumes that all distributions made by the First Trust ETF in the periods shown were reinvested in additional securities of the First Trust ETF. The performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the First Trust ETF has performed in the past does not necessarily indicate how it will perform in the future.

Year by Year Returns

The bar chart below shows the First Trust ETF’s performance, per class, for the six-month period ended June 30, 2017, for the years ended December 31, and for the period from since inception to December 31, 2013 and illustrate how the investment fund’s performance has changed from year to year. The chart also shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year.
