Forward-looking Statements

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts but instead represent beliefs regarding future events. By their nature, forward-looking statements are based on assumptions and are subject to inherent risks and uncertainties. There is significant risk that forward-looking statements will not prove to be accurate. Readers of this document should not place undue reliance on forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the expectations, estimates or intentions expressed or implied in the forward-looking statements. These factors include but are not limited to market and general economic conditions, interest rates, foreign currency exchange rates, the extent of industry sector exposure, the performance of the securities of the issuers held in the portfolio and regulatory developments and the risks detailed in the First Trust ETF's prospectus. The Manager does not undertake and specifically disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Investment Objective and Strategy

The fundamental investment objective of **First Trust AlphaDEX™ Emerging Market Dividend ETF (CAD-Hedged)** (the “First Trust ETF”) is to provide unitholders with exposure to the performance of a portfolio of dividend paying equity securities domiciled in the emerging markets and selected from the countries represented in the S&P BMI Emerging Markets Index as well as providing unitholders with monthly distributions.

To achieve its investment objectives, the First Trust ETF will primarily invest in common shares, GDRs, ADRs or other depository receipts listed on a major U.S. or Canadian stock exchange, of dividend paying companies in emerging countries as defined by the S&P Emerging Markets BMI Index. Securities will also be subject to an initial screening process to ensure sufficient liquidity (minimum three-month average daily trading volume of \$2.5 million), market capitalization (minimum of \$1 billion) and price per security (minimum of \$2). Eligible companies will then be assigned a score and ranked based on the AlphaDEX™ selection methodology which is a rules based methodology that analyzes companies based on five growth factors consisting of three, six and twelve month price appreciation, one year sales growth and sales-price ratio and three value factors consisting of book value-to-price ratio, cash flow-to-price ratio and return on assets. The top 75% of the eligible companies, based on selection score, will comprise the portfolio. The resulting stocks are not weighted based on market capitalization, but on the basis of potential investment merit. The selected stocks are then divided equally into quintiles based on their AlphaDEX™ methodology scores; the higher scoring quintiles are given a greater weight than lower scoring quintiles. The top ranked quintile receives a top weight of 5/15 (33.3%) of the portfolio with successive quintiles receiving 4/15 (26.7%), 3/15 (20.0%), 2/15 (13.3%) and 1/15 (6.7%). The First Trust ETF will generally seek to hedge substantially any of its U.S. dollar currency exposure back to the Canadian dollar.

The First Trust ETF will rebalance and reconstitute the portfolio of constituent securities semi-annually. Between rebalancing dates, the allocation between each of the constituent securities will change due to market movement and the portfolio advisor will typically not reallocate, include or exclude issuers from the First Trust ETF portfolio until its next rebalance date.

Risk

The AlphaDEX™ stock selection process is a rules-based process and can result in sector weightings that differ from that of the benchmark. The ability of the underlying securities to pay a dividend in the future is dependent on factors that are not controlled by fund management. A security held in the First Trust ETF may, at any time, decide to cut or eliminate its dividend payment. Given the First Trust ETF employs a currency hedging strategy to minimize the impact of changes in the USD-CAD exchange rate and considering that the portfolio remains consistent in its application of the AlphaDEX™ stock selection methodology to pick stocks for the portfolio, we conclude there was no material change to the risk profile of the First Trust ETF. Investors should refer to the most recent prospectus as it contains detailed discussion of risk relating to the investment of the First Trust ETF.

Results of Operations

General

The First Trust ETF's total net asset value as of December 31, 2021 was \$6,744,023 or \$14.99 per Common Class unit (“FDE”) and \$14.89 per Advisor Class unit (“FDE.A”). The First Trust ETF's total net asset value as of December 31, 2020 was \$5,395,784 or \$15.40 per FDE and \$15.32 per FDE.A.

For the year ended December 31, 2021, the First Trust ETF paid total cash distributions per unit of \$0.7650 for FDE and \$0.6300 for FDE.A. In addition, the First Trust ETF declared cash distributions per unit of \$0.2200 for FDE and \$0.1850 for FDE.A for record date of December 31, 2021 with payment date of January 10, 2022.

Investment Performance

For the year ended December 31, 2021, FDE returned 3.50% and FDE.A returned 2.36% compared to MSCI Emerging Market Index (USD) (the “benchmark”) return of -2.22%. Unlike the benchmark, the First Trust ETF's returns are net of fees and expenses.

First Trust AlphaDEX™ Emerging Market Dividend ETF (CAD-Hedged)

Management Report of Fund Performance

For the year ended December 31, 2021

The First Trust ETF outperformed the benchmark in 2021. Selection in Brazil and Hong Kong drove performance, followed by South Korea and Taiwan exposure. An underweight position in Consumer Discretionary drove most of the relative outperformance for the year. Information Technology holdings in the First Trust ETF also boosted relative performance due to stock selection. The First Trust ETF's holdings in Information Technology were some of the best performers on an absolute basis, along with the stocks in the Industrials sector. An underweight position combined with stock selection caused Financial holdings in the First Trust ETF to lag on a relative basis versus the benchmark.

The top five stocks by contribution to return were Tecnoglass Inc., PetroChina Company Limited Sponsored ADR, Wipro Limited Sponsored ADR, ASE Technology Holding Co., Ltd. Sponsored ADR, and Himax Technologies, Inc. Sponsored ADR. The bottom five stocks by contribution to return were FinVolution Group Sponsored ADR Class A, Companhia Brasileira de Distribuicao Sponsored ADR, Autohome, Inc. Sponsored ADR Class A, Sociedad Quimica Y Minera De Chile S.A. Sponsored ADR Pfd Class B, and JOYY, Inc. Sponsored ADR Class A.

The portfolio held 42 equity securities at the end of the reporting period. The top ten equity holdings accounted for 39.80% of the portfolio. Materials, Utilities, and Industrials were the top three sector weightings at the beginning of the reporting year. At the end of the year, Information Technology, Financials, and Consumer Discretionary were the top three sector weightings. During the first half of the year, the First Trust ETF added 15 positions and removed 9 positions. The rebalance in early December added 8 positions while removing an equal 8 positions. The changes were made by applying the quantitative AlphaDEX™ selection methodology to a universe of emerging market dividend-paying stocks.

During the period, the currency hedge was beneficial to the First Trust ETF as the U.S. dollar weakened versus the Canadian dollar.

Recent Developments

Over the reporting period, emerging market equities underperformed their developed market peers. Emerging market growth prospects, which were hampered by COVID and rising input costs, have been refueled by Technology and Health Care providing transformative shifts to emerging economies. Asia in particular had an effective virus response which has led to growth in the nations where the global pandemic originated for the first half of the year. During the second half, inflation posed a threat to growth as supply chains were disrupted by labor shortages combined with an increase in demand driven by loose monetary policies. Central banks are watching closely and should provide an appropriate response of raising interest rates without hurting the global economy.

As of February 28, 2022, the First Trust ETF is no longer offering FDE.A and the Manager successfully redesignated FDE.A to FDE providing unitholders with a lower cost solution going forward.

(1) This information is provided as at December 31 of the years shown and is prepared under IFRS.

(2) Net asset value and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the year.

(3) Distributions were paid in cash or reinvested in additional units of the First Trust ETF, or both. Non-cash distributions are reinvested in additional units of the First Trust ETF and subsequently consolidated. Neither the number of units held by the unitholder, nor the net asset per unit of the First Trust ETF change as a result of any non-cash distributions.

(4) This table is not intended to be a reconciliation of beginning to ending net asset value per unit.

(1) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated year and is expressed as an annualized percentage of daily average net asset value during the year.

(2) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the year.

(3) The First Trust ETF's portfolio turnover rate indicates how actively the First Trust ETF's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the First Trust ETF buying and selling all of the securities in its portfolio once in the course of the year. The higher a First Trust ETF's portfolio turnover rate in a year, the greater the trading cost payable by the First Trust ETF in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between high turnover rate and the performance of a First Trust ETF.

Management Fees

The First Trust ETF will pay the Manager a management fee of 0.65% and, in respect of the FDE.A, an additional amount for a service fee (see "FDE.A Service Fee" below) based on the average daily NAV of the First Trust ETF. The management fee, plus applicable taxes including HST, will be accrued daily and paid monthly in arrears. The Manager may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time.

FDE.A Service Fee

The Manager pays registered dealers a service fee equal to 1.00% per annum of the NAV of the Units held by clients of the registered dealer, plus any applicable taxes. The service fee will be calculated and accrued daily and paid quarterly at the end of each calendar quarter.
