# **INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE**

## **June 30, 2021**

### **First Trust Value Line® Dividend Index ETF (CAD-Hedged) (the “First Trust ETF”)**

This interim management report of fund performance contains financial highlights, but does not contain the complete unaudited interim financial statements of the First Trust ETF. All references to dollars contained herein are to Canadian dollars.

Securityholders may also contact us to request a copy of the First Trust ETF's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosures relating to the First Trust ETF by calling 1-877-622-5552, by writing to us at FT Portfolios Canada Co., 40 King Street West, Suite 5102, Scotia Plaza, Box 312, Toronto, Ontario M5H 3Y2 or by visiting our website at [www.firsttrust.ca](http://www.firsttrust.ca) or SEDAR at [www.sedar.com](http://www.sedar.com).

### **Forward-looking Statements**

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts but instead represent beliefs regarding future events. By their nature, forward-looking statements are based on assumptions and are subject to inherent risks and uncertainties. There is significant risk that forward-looking statements will not prove to be accurate. Readers of this document should not place undue reliance on forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the expectations, estimates or intentions expressed or implied in the forward-looking statements. These factors include but are not limited to market and general economic conditions, interest rates, foreign currency exchange rates, the extent of industry sector exposure, the performance of the securities of the issuers held in the portfolio and regulatory developments and the risks detailed in the First Trust ETF's prospectus. The Manager does not undertake and specifically disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

## Management Report of Fund Performance

### For the six-month period ended June 30, 2021

---

#### **Investment Objective and Strategy**

The fundamental investment objective of **First Trust Value Line® Dividend Index ETF (CAD-Hedged)** is to replicate, to the extent possible, the performance of the Value Line® Dividend Index (the “Index”) on a currency hedged basis, net of expenses. The Index is a modified equal-dollar weighted index comprised of U.S. exchange-listed securities of companies that pay above-average dividends and have the potential for capital appreciation. Securities are selected for inclusion in the Index by using Value Line’s Safety™ Ranking System which ranks a stock’s price stability based on standard deviation and its financial condition based on several measures of financial performance. Prior to November 22, 2017 the investment objective of the fund was to replicate, to the extent possible, the performance of the First Trust AlphaDEX™ Canadian Dividend Index.

The investment strategy of the First Trust ETF is to invest in and hold a proportionate share of the constituent securities of the Index, or other securities, to seek to replicate the performance of such Index. The First Trust ETF may also hold cash and cash equivalents or other money market instruments to fund current liabilities.

FT Portfolios Canada Co. (the “Manager”), the Manager may use a sampling methodology in selecting investments for the First Trust ETF. As an alternative or in conjunction with investing in and holding constituent securities, the First Trust ETF may also invest in other securities to obtain exposure to the constituent securities of the Index in a manner that is consistent with the investment objective and investment strategy of the First Trust ETF. The First Trust ETF may also obtain exposure to the Index by holding securities of a US-listed index ETF of an affiliate of the Manager, First Trust Value Line® Dividend Index Fund, which replicates or substantially replicates the performance of the Index.

The Index begins with the universe of U.S. stocks, excluding all registered investment companies, limited partnerships and foreign securities not listed in the U.S., that Value Line® gives a Safety™ Ranking of #1 or #2 using the Value Line® Safety™ Ranking System. The Safety™ ranking measures the total risk of a stock relative to the other stocks in the Value Line universe. From those stocks, Value Line® selects those companies with a higher than average dividend yield, as compared to the indicated dividend yield of the Standard & Poor’s 500 Composite Stock Price Index. Value Line® then eliminates those companies with an equity market capitalization of less than US \$1 billion. The Index is equally weighted and rebalanced on a monthly basis.

#### **Risk**

The Index the First Trust ETF tracks utilizes a rules-based stock selection process and can result in sector weightings that differ from the primary and secondary benchmarks, S&P 500 Index (CAD-Hedged) total return and Dow Jones US Select Dividend Index Return (USD), respectively. The ability of the underlying securities to pay a dividend in the future is dependent on factors that are not controlled by fund management. A security held in the First Trust ETF may, at any time, decide to cut or eliminate its dividend payment. Given the First Trust ETF employs a currency hedging strategy to minimize the impact of changes in the USD-CAD exchange rate and considering that the portfolio remains consistent in its application of the Value Line® stock selection methodology to pick stocks for the portfolio, we conclude there was no material change to the risk profile of the First Trust ETF. Investors should refer to the most recent prospectus as it contains detailed discussion of risk relating to the investment of the First Trust ETF.

#### **Results of Operations**

##### **General**

The First Trust ETF’s total net asset value as of June 30, 2021 was \$15,030,627 or \$33.43 per Common Class unit (“FUD”) and \$33.37 per Advisor Class unit (“FUD.A”). The First Trust ETF’s total net asset value as of December 31, 2020 was \$17,753,317 or \$29.60 per FUD and \$29.56 per FUD.A.

---

# First Trust Value Line® Dividend Index ETF (CAD-Hedged)

## Management Report of Fund Performance

### For the six-month period ended June 30, 2021

---

For the six-month period ended June 30, 2021, the First Trust ETF paid total cash distributions per unit of \$0.2700 for FUD and \$0.1200 for FUD.A. In addition, the First Trust ETF declared cash distributions per unit of \$0.0450 for FUD and \$0.0200 for FUD.A for record date of June 30, 2021 with payment date of July 8, 2021.

#### ***Investment Performance***

For the six-month period ended June 30, 2021, FUD returned 13.88% and FUD.A returned 13.30% compared to the primary and secondary benchmarks, S&P 500 Index (CAD-Hedged) total return of 15.27% and Dow Jones U.S. Select Dividend™ Index Return (USD) total return of 23.69%. Unlike the benchmarks, the First Trust ETF's returns are net of fees and expenses.

The First Trust ETF underperformed the broad benchmark during the period. An overweight in Utilities stocks had a negative effect on relative return. The stocks in the sector held by the fund had a positive absolute return but trailed the benchmark on an absolute basis. One of the best performing groups in the benchmark, Energy, was underrepresented in the fund for the period. The underweight position caused the group to lag the benchmark on a relative basis. Although Information Technology stocks were underweight in the fund, the group performed well during the last six months. The relative performance of the tech stocks in the fund led the group to be the best relative performer during the period. The fund's exposure to low volatility was a drag on performance as the factor was one of the worst performing factors during the first half of the year.

The top five stocks by contribution to return were Shaw Communications Inc. Class B, Robert Half International Inc., Goldman Sachs Group, Inc., International Flavors & Fragrances Inc., and Eli Lilly and Company. The bottom five stocks by contribution to return were Erie Indemnity Company Class A, NewMarket Corporation, Middlesex Water Company, Clorox Company and, McCormick & Company, Incorporated.

The portfolio held 201 equity securities on June 30, 2021. The top ten equity holdings accounted for 5.24% of the portfolio. Financials, Utilities and Industrials were the top three sector weightings at the beginning of the year. On June 30, 2021, the top three sector weights were Utilities, Industrials, and Financials. The most overweight sectors at the end of the year were Financials, Utilities, and Industrials. The most underweight sectors at the end of the year were Energy, Communication Services, and Information Technology. At the beginning of the year, the most overweight sectors were Utilities, Financials, and Industrials. The most underweight sectors at the beginning of the year were Information Technology, Consumer Discretionary, and Communication Services. The First Trust ETF maintains a focus on large cap dividend paying equities.

During the year, the currency hedge was beneficial to the First Trust ETF as the U.S. dollar depreciated versus the Canadian dollar.

#### **Recent Developments**

Vaccines led to robust reopening in first half especially for the cyclical areas of the economy hurt most by initial Covid restrictions. Fresh rounds of stimulus and government spending has provided a safety net to the economy after many business and individuals suffered during the past year. Corporate profits continue to recover and exceed pre-pandemic levels through the first half of the year. Commodity prices have been in focus as input costs rise for many corporations and inflation risk persists.

#### **Related Party Transactions**

FT Portfolios Canada Co. is the Manager of the First Trust ETF and is a Canadian affiliate of First Trust Advisors L.P., the investment advisor (the "Advisor") of the First Trust ETF.

Pursuant to terms of the declaration of trust of the First Trust ETF, the Manager provides or arranges for all management, administrative and other services required by the First Trust ETF. The Manager receives a management fee from the First Trust ETF. For further details, please see "Management Fees".

The Manager has retained the Advisor to provide certain services to the First Trust ETF pursuant to an investment advisory agreement. The Advisor receives advisory fees from the Manager out of the management fee.

(1) This information is provided as at June 30, 2021 and December 31 years shown and is prepared under IFRS.

(2) Net asset value and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the period/year.

(3) Distributions were paid in cash or reinvested in additional units of the First Trust ETF, or both. Non-cash distributions are reinvested in additional units of the First Trust ETF and subsequently consolidated. Neither the number of units held by the unitholder, nor the net asset per unit of the First Trust ETF change as a result of any non-cash distributions.

(4) This table is not intended to be a reconciliation of beginning to ending net asset value per unit.

Net asset value per unit	\$33.37	\$29.56	\$30.88	\$25.35	\$27.16	\$24.35

(1) Management expense ratio is based on total expenses for the stated period and is expressed as an annualized percentage of daily average net asset value during the period/year.

(2) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period/year.

(3) The First Trust ETF's portfolio turnover rate indicates how actively the First Trust ETF's Portfolio Advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the First Trust ETF buying and selling all of the securities in its portfolio once in the course of the period/year. The higher a First Trust ETF's portfolio turnover rate in a year, the greater the trading cost payable by the First Trust ETF in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between high turnover rate and the performance of a First Trust ETF.

**Management Fees**

The First Trust ETF will pay the Manager a management fee of 0.70% and, in respect of the FUD.A, an additional amount for a service fee (see "FUD.A Service Fee" below) based on the average daily NAV of the First Trust ETF. The management fee, plus applicable taxes including HST, will be accrued daily and paid monthly in arrears. The Manager may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time.

**FUD.A Service Fee**

The Manager pays registered dealers a service fee equal to 1.00% per annum of the NAV held by clients of the registered dealer, plus any applicable taxes. The service fee will be calculated and accrued daily and paid quarterly at the end of each calendar quarter.

**Management Report of Fund Performance**  
**For the six-month period ended June 30, 2021**

**Past Performance**

**General**

The past performance information shown assumes that all distributions made by the First Trust ETF in the period/years shown were reinvested in additional securities of the First Trust ETF. The performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the First Trust ETF has performed in the past does not necessarily indicate how it will perform in the future.

**Year by Year Returns**

The bar chart below shows the First Trust ETF's performance, per class, for the six-month period ended June 30, 2021, for the years ended December 31, and for the period from commencement of operations to December 31, 2013 and illustrates how the investment fund's performance has changed from year to year. The chart also shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year.
