Forward-looking Statements

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts but instead represent beliefs regarding future events. By their nature, forward-looking statements are based on assumptions and are subject to inherent risks and uncertainties. There is significant risk that forward-looking statements will not prove to be accurate. Readers of this document should not place undue reliance on forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the expectations, estimates or intentions expressed or implied in the forward-looking statements. These factors include but are not limited to market and general economic conditions, interest rates, foreign currency exchange rates, the extent of industry sector exposure, the performance of the securities of the issuers held in the portfolio and regulatory developments and the risks detailed in the First Trust ETF's prospectus. The Manager does not undertake and specifically disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Investment Objective and Strategy

The fundamental investment objective of **First Trust AlphaDEX™ European Dividend Index ETF (CAD-Hedged)** (the “First Trust ETF”) is to replicate, to the extent possible, the performance of the AlphaDEX™ European Dividend Index (the “Index”), net of expenses. The Index results from applying the AlphaDEX™ methodology to a universe of ADRs of European companies that are listed on the NYSE, NYSE Market and NASDAQ exchanges.

The investment strategy of the First Trust ETF is to invest in and hold a proportionate share of the constituent securities of the Index, or other securities, to seek to replicate the performance of the Index. The First Trust ETF may also hold cash and cash equivalents or other money market instruments to fund current liabilities. The First Trust ETF will generally seek to hedge substantially all of its U.S. dollar, British pounds sterling, euros and Swiss francs currency exposure associated with its portfolio investments back to the Canadian dollar.

The Index is developed, maintained and sponsored by the index provider, which employs the AlphaDEX™ stock selection methodology to select dividend paying ADRs from a universe of ADRs of European companies that meet certain investment criteria. The index provider constructs the Index by ranking the eligible universe of ADRs on growth factors including 3-month, 6-month and 12-month price appreciation, sales to price and one year sales growth, and then separately on value factors, including, book value to price, cash flow to price and return on assets. All ADRs are ranked on the sum of ranks for the growth factors, and separately all ADRs are ranked on the sum of ranks for the value factors. An ADR must have data for all growth and/or value factors to receive a rank for that style. The top 75% of the ADRs are then selected based on the better of their growth or value rank. The selected ADRs are divided into quintiles based on their rankings. The top ranked quintile receives a top weight of 5/15 (33.3%) of the portfolio with successive quintiles receiving 4/15 (26.7%), 3/15 (20.0%), 2/15 (13.3%) and 1/15 (6.7%). The ADRs are equally-weighted within each quintile. The Index will be rebalanced semi-annually and the constituent issuers in the Index will be adjusted at that time.

Risk

The AlphaDEX™ stock selection process is a rules-based process and can result in sector weightings that differ from that of the MSCI Europe Index in local currency (the “benchmark”). The First Trust ETF invests in a base universe of stocks that pay dividends. The ability of the underlying stocks to pay a dividend in the future is dependent on factors that are not controlled by fund management. A security held in the First Trust ETF may, at any time, decide to cut or eliminate its dividend payment. Given the First Trust ETF employs a currency hedging strategy (GBP/CAD, EUR/CAD, CHF/CAD) to minimize the impact of changes in the exchange rates of hedged currencies and considering that the portfolio continues to seek to replicate the Index, we conclude there was no material change to the risk profile of the First Trust ETF. Investors should refer to the most recent prospectus as it contains detailed discussion of risk relating to the investment of the First Trust ETF.

Results of Operations

General

The First Trust ETF's total net asset value as of December 31, 2021 was \$6,439,458 or \$21.48 per Common Class unit (“EUR”) and \$21.35 per Advisor Class unit (“EUR.A”). The First Trust ETF's total net asset value as of December 31, 2020 was \$5,817,728 or \$19.40 per EUR and \$19.29 per EUR.A.

For the year ended December 31, 2021, the First Trust ETF paid total cash distributions per unit of \$0.7450 for EUR and \$0.6000 for EUR.A. In addition, the First Trust ETF declared cash distributions per unit of \$0.1768 for EUR and \$0.0755 for EUR.A for record date of December 31, 2021 with payment date of January 10, 2022.

Investment Performance

For the year ended December 31, 2021, EUR returned 15.38% and EUR.A returned 14.11% compared to the benchmark return of 22.61%. Unlike the benchmark, the First Trust ETF's returns are net of fees and expenses.

The First Trust ETF's strategy underperformed due to selection in the Health Care and Communication Services sectors. Some of the underperformance was offset by stock selection in the Utilities sector. The group was one of the

worst-performing sectors in the benchmark on an absolute basis but was one of the top-performing groups in the First Trust ETF. Communication Services, one of the largest overweight positions in the First Trust ETF, detracted from relative performance as the group underperformed the benchmark on both an absolute and relative basis. Positive selection in the Real Estate and Industrials sectors were all accretive to relative performance during the year.

The top five stocks by contribution to return were ASML Holding NV ADR, ABB Ltd. Sponsored ADR, UBS Group AG, Logitech International S.A., and Aegon NV ADR. The bottom five stocks by contribution to return were Micro Focus International plc Sponsored ADR, Credit Suisse Group AG Sponsored ADR, Fresenius Medical Care AG & Co. KGaA Sponsored ADR, Grifols, S.A. Sponsored ADR Class B, Anheuser-Busch InBev SA/NV Sponsored ADR.

The currency hedging strategy benefitted the fund during the year with the basket of currencies performing favorably against the Canadian dollar.

The portfolio held 35 equity securities at the end of the reporting period. The top ten equity holdings accounted for 45.05% of the portfolio. Financials, Information Technology, and Materials were the top three sector weightings at the beginning of the reporting year. At the end of the period, the top sector weightings were Financials, Health Care, and Industrials. At the end of the period, Communication Services, Financials, and Energy holdings were the most overweight positions relative to the benchmark. Industrials, Consumer Staples, and Health Care were the most underweight sectors relative to the benchmark at the end of the year. At the beginning of the year, the top three overweight sectors were Information Technology, Communication Services, and Financials. The most underweight sectors at the beginning of the year were Consumer Staples, Industrials, and Consumer Discretionary. During the first half of the year, the First Trust ETF added 12 positions and removed 5 positions. During the rebalance in early December, the fund added 7 positions and removed 6 positions. The changes were made by applying the quantitative AlphaDEX™ selection methodology to a universe of European market dividend-paying stocks.

Recent Developments

The global vaccine rollout and subsequent uptake has moved economies around the world back toward a more normal existence though Europe has been forced to reinstate some restrictions in a bid to curb the rise in COVID-19 infections resulting from the Delta variant in the first half of the year and the Omicron variant during the second half of the year. Despite the restrictions and rising cases, the EU is on track to expand by 5.0% in 2021 and 4.3% in 2022 according to the European Commission. Real GDP is also expected to make a full recovery from 2019. Strong employment and demand for goods from trading partners helped European economies recover at a faster pace than originally forecasted in 2021. A slight downgrade to growth in 2022 in the face of rising COVID-19 cases is now the prevailing forecast.

As of February 28, 2022, the First Trust ETF is no longer offering EUR.A and the Manager successfully redesignated EUR.A to EUR providing unitholders with a lower cost solution going forward.

(1) This information is provided as at December 31 of the years shown and is prepared under IFRS.

(2) Net asset value and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the year.

(3) Distributions were paid in cash or reinvested in additional units of the First Trust ETF, or both. Non-cash distributions are reinvested in additional units of the First Trust ETF and subsequently consolidated. Neither the number of units held by the unitholder, nor the net asset per unit of the First Trust ETF change as a result of any non-cash distributions.

(4) This table is not intended to be a reconciliation of beginning to ending net asset value per unit.

(1) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated year and is expressed as an annualized percentage of daily average net asset value during the year.

(2) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the year.

(3) The First Trust ETF's portfolio turnover rate indicates how actively the First Trust ETF's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the First Trust ETF buying and selling all of the securities in its portfolio once in the course of the year. The higher a First Trust ETF's portfolio turnover rate in a year, the greater the trading cost payable by the First Trust ETF in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between high turnover rate and the performance of a First Trust ETF.

Management Fees

The First Trust ETF will pay the Manager a management fee of 0.60% and, in respect of the EUR.A, an additional amount for a service fee (see "EUR.A Service Fee" below) based on the average daily NAV of the First Trust ETF. The management fee, plus applicable taxes including HST, will be accrued daily and paid monthly in arrears. The Manager may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time.

EUR.A Service Fee

The Manager pays registered dealers a service fee equal to 1.00% per annum of the NAV of the Units held by clients of the registered dealer, plus any applicable taxes. The service fee will be calculated and accrued daily and paid quarterly at the end of each calendar quarter.
