Forward-looking Statements

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts but instead represent beliefs regarding future events. By their nature, forward-looking statements are based on assumptions and are subject to inherent risks and uncertainties. There is significant risk that forward-looking statements will not prove to be accurate. Readers of this document should not place undue reliance on forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the expectations, estimates or intentions expressed or implied in the forward-looking statements. These factors include but are not limited to market and general economic conditions, interest rates, foreign currency exchange rates, the extent of industry sector exposure, the performance of the securities of the issuers held in the portfolio and regulatory developments and the risks detailed in the First Trust ETF's prospectus. The Manager does not undertake and specifically disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Investment Objective and Strategy

The fundamental investment objective of **First Trust Nasdaq Cybersecurity ETF** (the “First Trust ETF”) is to replicate, to the extent possible, the performance of an index of U.S. companies in the cybersecurity industry, initially the Nasdaq CTA Cybersecurity Index™.

The Nasdaq CTA Cybersecurity Index™ is designed to track the performance of companies engaged in the cybersecurity segment of the technology and industrials sectors. It includes companies primarily involved in the building, implementation, and management of security protocols applied to private and public networks, computers, and mobile devices in order to provide protection of the integrity of data and network operations.

Risk

The First Trust ETF provides exposure to its index by investing all or substantially all of its assets in an underlying U.S. index fund known as First Trust Nasdaq Cybersecurity ETF (the “Underlying Fund”), which is managed by the First Trust ETF’s portfolio advisor.

The risks associated with an investment in the First Trust ETF is discussed in the First Trust ETF’s most recent prospectus.

Results of Operations

General

The First Trust ETF’s net asset value as of December 31, 2022 was \$26,275,764 or \$30.55 per unit. The First Trust ETF’s net asset value as of December 31, 2021 was \$32,756,587 or \$39.00 per unit.

For the year ended December 31, 2022, the First Trust ETF paid total cash distributions per unit of \$0.4235. The First Trust ETF also made a notional distribution per unit of \$0.0616 for the year ended December 31, 2022. This amount was reinvested in the First Trust ETF and not paid in cash to unitholders.

Investment Performance

For the year ended December 31, 2022, the First Trust ETF returned -21.44% compared to the S&P 500® Index (the “benchmark”) return of -12.16%. Unlike the benchmark, the First Trust ETF’s return is net of fees and expenses.

The First Trust ETF’s only holding, the Underlying Fund, held 37 equity securities as of December 31, 2022. The top ten equity holdings for the Underlying Fund accounted for 45.96% of the portfolio within the Underlying Fund.

The Underlying Fund underperformed the benchmark during the reporting year. The Underlying Fund had a heavy overweight of Information Technology, which was the third worst performing sector within the benchmark. Stock selection within Information Technology also contributed to underperformance. Additionally, currency effects contributed to the underperformance as the U.S. dollar appreciated significantly relative to leading global currencies during the year, and the Underlying Fund was relatively less exposed to U.S. companies than the benchmark during the year. The underperformance was mitigated by both stock selection within and an overweight allocation to Industrials.

The Underlying Fund’s top five stocks by contribution to return were Thales S.A., Broadcom Inc., Mandiant, Inc., Science Applications International Corporation, and Booz Allen Hamilton Holding Corporation. The bottom five stocks by contribution to return were Cloudflare, Inc., CrowdStrike Holdings, Inc., Zscaler, Inc., Okta, Inc., and Rapid7, Inc.

The First Trust’s ETF’s exposure to the U.S. dollar contributed positively to its absolute performance during the year as the U.S. dollar appreciated 6.96% against the Canadian dollar from December 31, 2021 to December 31, 2022.

Recent Developments

Cybercrime remains elevated as government agencies, hospital networks, corporations, energy companies and others face constant network threats. Companies must protect against corporate espionage, loss of client data, unauthorized computer access and much more at a time when more users are remotely connecting to networks outside of the traditional corporate firewall. Cybersecurity solutions must be dynamic as attackers quickly adapt to new solutions. Cloud solutions have been increasingly adopted and a new set of highly scalable businesses built on new security solution sets, such as zero-trust, have emerged and attracted large amounts of corporate spending. While new technology solutions must be protected, existing ones also require securing. This has enabled the market for cybersecurity solutions to continue expanding and offers investors securities with generally high growth rates relative to the broader market. Tightening economic conditions have made vendor consolidation an explicit focus for technology users and the cybersecurity industry remains highly fragmented and competitive. Platforms that can provide more comprehensive solutions should benefit but smaller, legacy and niche cybersecurity companies may lose out as purchasers seek to reduce costs, headcounts, number of products and consolidate vendors. The Credit Suisse CIO survey provides an insight into possible corporate spending initiatives and expected areas of focus for CAPEX and Research & Development. While hyperscale cloud migration is the top priority, five of the top ten corporate spending priorities are cybersecurity related for CIOs. Within technology, Cybersecurity is expected to remain more defensive as the elevated threat profile induces companies to continue investing in security initiatives.

(a) Effective February 17, 2021, the First Trust ETF is fully invested in the Underlying Fund.

(1) This information is provided as at December 31 of the years shown and is prepared under IFRS.

(2) Net asset value and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the year.

(3) Distributions were paid in cash or reinvested in additional units of the First Trust ETF, or both. Non-cash distributions are reinvested in additional units of the First Trust ETF and subsequently consolidated. Neither the number of units held by the unitholder, nor the net asset per unit of the First Trust ETF change as a result of any non-cash distributions.

(4) This table is not intended to be a reconciliation of beginning to ending net asset value per unit.

Ratios and Supplemental Data

CIBR	2022	2021 ^(a)	2020	2019	2018
Net asset value (000's)	\$26,276	\$32,757	\$4,559	\$2,784	\$2,394

Portfolio turnover rate ⁽³⁾	42.90%	148.99%	431.90%	173.25%	370.25%

(a) Effective February 17, 2021, the First Trust ETF is fully invested in the Underlying Fund.

(1) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated year, including the First Trust ETF's proportionate share of the MER of the Underlying Fund in which the First Trust ETF has invested, and is expressed as an annualized percentage of daily average net asset value during the year.

(2) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the year. This includes the First Trust ETF's proportionate share of the commissions of Underlying Fund in which the First Trust ETF has invested.

(3) The First Trust ETF's portfolio turnover rate indicates how actively the First Trust ETF's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the First Trust ETF buying and selling all of the securities in its portfolio once in the course of the year. The higher a First Trust ETF's portfolio turnover rate in a year, the greater the trading cost payable by the First Trust ETF in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between high turnover rate and the performance of a First Trust ETF.

Management Fees

The First Trust ETF will pay the Manager a management fee of 0.15% based on the average daily NAV of the First Trust ETF. The management fee, plus applicable taxes including HST, will be accrued daily and paid monthly in arrears. The Manager may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time.

The First Trust ETF will bear the Underlying Fund's management fee of 0.60% per annum on average daily net assets on the First Trust ETF's portfolio assets invested in the Underlying Fund. Accordingly, the management fee cost to unitholders of their investment will be 0.75% per annum of NAV of the First Trust ETF plus applicable taxes.

Past Performance

General

The past performance information shown assumes that all distributions made by the First Trust ETF in the period/years shown were reinvested in additional securities of the First Trust ETF. The performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the First Trust ETF has performed in the past does not necessarily indicate how it will perform in the future.
