## Management Report of Fund Performance

### For the six-month period ended June 30, 2024

---

#### **Investment Objective and Strategy**

The fundamental investment objective of **First Trust Nasdaq Cybersecurity ETF** (the “First Trust ETF”) is to replicate, to the extent possible, the performance of an index of U.S. companies in the cybersecurity industry, initially the Nasdaq CTA Cybersecurity Index™.

The Nasdaq CTA Cybersecurity Index™ is designed to track the performance of companies engaged in the cybersecurity segment of the technology and industrials sectors. It includes companies primarily involved in the building, implementation, and management of security protocols applied to private and public networks, computers, and mobile devices in order to provide protection of the integrity of data and network operations.

#### **Risk**

The First Trust ETF provides exposure to its index by investing all or substantially all of its assets in an underlying U.S. index fund known as First Trust Nasdaq Cybersecurity ETF (the “Underlying Fund”), which is managed by the First Trust ETF’s portfolio advisor.

The risks associated with an investment in the First Trust ETF is discussed in the First Trust ETF’s most recent prospectus.

#### **Results of Operations**

##### **General**

The First Trust ETF’s net asset value as of June 30, 2024, was \$55,082,132 or \$44.78 per unit. The First Trust ETF’s net asset value as of December 31, 2023, was \$37,747,260 or \$41.48 per unit.

For the six-month period ended June 30, 2024, the First Trust ETF paid total cash distributions of \$0.1550 per unit. In addition, the First Trust ETF declared cash distributions of \$0.0600 per unit for record date of June 28, 2024, with payment date of July 8, 2024.

##### **Investment Performance**

For the six-month period ended June 30, 2024, the First Trust ETF returned 8.25% compared to the S&P 500® Index (the “benchmark”) return of 19.64%. Unlike the benchmark, the First Trust ETF’s return is net of fees and expenses.

The First Trust ETF’s only holding, the Underlying Fund, held 30 equity securities as of June 30, 2024. The top ten equity holdings for the Underlying Fund accounted for 62.12% of the portfolio within the Underlying Fund.

The Underlying Fund underperformed the benchmark during the period primarily due to stock selection within the Information Technology sector, the best-performing sector within the benchmark. Within Information Technology, no weight in NVIDIA Corporation contributed notably to the underperformance. Despite poor stock selection within the sector, an overweight allocation to Information Technology mitigated the underperformance.

The Underlying Fund’s top five stocks by contribution to return were CrowdStrike Holdings, Inc., Broadcom Inc., Darktrace plc, Palo Alto Networks, Inc., and Leidos Holdings, Inc. The Underlying Fund’s bottom five stocks by contribution to return were SentinelOne, Inc., Rapid7, Inc., Open Text Corporation, Qualys, Inc., and Trend Micro Incorporated.

The First Trust’s ETF’s exposure to the U.S. dollar contributed positively to its absolute performance during the period, as the U.S. dollar appreciated 3.54% against the Canadian dollar from December 31, 2023, to June 30, 2024.

#### **Recent Developments**

Recently cybersecurity has been headlined by more data breaches, CMMC 2.0, and “Platformization”. Major scale cyber-attacks are only ramping up with the introduction of AI to ransomware attacks. In June, the largest software name among car dealerships, CDK, was hit by a cyber-attack causing data outages that inhibited sales and

operations for multiple weeks. Cybercrime remains elevated as government agencies, hospital networks, corporations, energy companies and others face constant network threats. Companies must protect against corporate espionage, loss of client data, unauthorized computer access and much more at a time when more users are remotely connecting to networks outside of the traditional corporate firewall. Cybersecurity solutions must be dynamic as attackers quickly adapt to new solutions. Recent discussion on personal liability for CEOs of companies with cybersecurity breaches will only reinforce spending in this area as a top priority for many companies. Within technology, Cybersecurity is expected to remain more defensive as the elevated threat profile induces companies to continue investing in security initiatives. In a development of the Department of Defense (DoD) earlier this year, Cybersecurity Maturity Model Certification 2.0 was released. This outline streamlined requirements for cybersecurity that comes with DoD contracts. Cybersecurity is continuing to shift from a nice to have, to a must have, when it comes to creating reliable business partnerships. A recent Accenture survey found that more than half of organizations said cybersecurity is required before any digital transformations, revealing the importance of not treating cybercrime in a reactionary or incident-driven way. Additionally, Palo Alto, the largest name in the Cyber security industry, released plans to shift to a new business model focusing on “platformization”. This is a more horizontal approach than previously seen, sending a shock through cyber companies and investors. Palo Alto will attempt to reach into all lanes of cyber security, as smaller niche companies will fend off their specialty markets. As mentioned earlier, the emergence of generative AI as a mainstream capability is shaping the cybersecurity landscape. It offers both opportunities and challenges, impacting threat detection, response, and adaptive security measures. All parties must remain informed and agile to navigate the ever-changing landscape of cybersecurity.

(a) For the years prior to February 17, 2021, represent returns for the First Trust ETF based on the First Trust ETF's investment objective prior to the change in investment objective which occurred on February 17, 2021.

(1) This information is provided as at June 30, 2024 and December 31 of the period/years shown and is prepared under IFRS.

(2) Net asset value and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the year.

(3) Distributions were paid in cash or reinvested in additional units of the First Trust ETF, or both. Non-cash distributions are reinvested in additional units of the First Trust ETF and subsequently consolidated. Neither the number of units held by the unitholder, nor the net asset per unit of the First Trust ETF change as a result of any non-cash distributions.

(4) This table is not intended to be a reconciliation of beginning to ending net asset value per unit.

#### Ratios and Supplemental Data

CIBR	2024	2023	2022	2021 <sup>(a)</sup>	2020	2019
Net asset value (000's)	\$55,082	\$37,747	\$26,276	\$32,757	\$4,559	\$2,784

Portfolio turnover rate <sup>(3)</sup>	2.25%	8.03%	42.90%	148.99%	431.90%	173.25%

(a) For the years prior to February 17, 2021, represent returns for the First Trust ETF based on the First Trust ETF's investment objective prior to the change in investment objective which occurred on February 17, 2021.

(1) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period/year, including the First Trust ETF's proportionate share of the MER of the Underlying Fund in which the First Trust ETF has invested, and is expressed as an annualized percentage of daily average net asset value during the period/year.

(2) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period/year. This includes the First Trust ETF's proportionate share of the commissions of Underlying Fund in which the First Trust ETF has invested.

(3) The First Trust ETF's portfolio turnover rate indicates how actively the First Trust ETF's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the First Trust ETF buying and selling all of the securities in its portfolio once in the course of the period/year. The higher a First Trust ETF's portfolio turnover rate in a period/year, the greater the trading cost payable by the First Trust ETF in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between high turnover rate and the performance of a First Trust ETF.
