ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

December 31, 2021

First Trust Dow Jones Internet ETF (the “First Trust ETF”)

This annual management report of fund performance contains financial highlights but does not contain the complete audited annual financial statements of the First Trust ETF. All references to dollars contained herein are to Canadian dollars.

Securityholders may also contact us to request a copy of the First Trust ETF’s proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosures relating to the First Trust ETF by calling 1-877-622-5552, by writing to us at FT Portfolios Canada Co., 40 King Street West, Suite 5102, Scotia Plaza, Box 312, Toronto, Ontario M5H 3Y2 or by visiting our website at www.firsttrust.ca or SEDAR at www.sedar.com.

Forward-looking Statements

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts but instead represent beliefs regarding future events. By their nature, forward-looking statements are based on assumptions and are subject to inherent risks and uncertainties. There is significant risk that forward-looking statements will not prove to be accurate. Readers of this document should not place undue reliance on forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the expectations, estimates or intentions expressed or implied in the forward-looking statements. These factors include but are not limited to market and general economic conditions, interest rates, foreign currency exchange rates, the extent of industry sector exposure, the performance of the securities of the issuers held in the portfolio and regulatory developments and the risks detailed in the First Trust ETF’s prospectus. The Manager does not undertake and specifically disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Investment Objective and Strategy

The fundamental investment objective of **First Trust Dow Jones Internet ETF** (the “First Trust ETF”) is to replicate, to the extent possible, the performance of an index of U.S. companies involved in the internet industry, initially the Dow Jones Internet Composite IndexSM.

The Dow Jones Internet Composite IndexSM, is a float-adjusted market capitalization weighted index designed to represent the largest and most actively traded stocks of U.S. companies in the Internet industry.

Risk

In February 2021, the First Trust AlphaDEXTM U.S. Consumer Staples Sector Index ETF changed its investment objectives (see Investment Objective and Strategy) and its name to the First Trust ETF and offer both units and hedged units to the U.S. dollar. The First Trust ETF provides exposure to its new index by investing all or substantially all of its assets in an underlying U.S. index fund known as First Trust Dow Jones Internet Index Fund (the “Underlying Fund”), which is managed by the First Trust ETF’s portfolio advisor. The effective date of change is February 17, 2021.

The risks associated with an investment in the First Trust ETF is discussed in the First Trust ETF’s most recent prospectus.

Results of Operations

General

The First Trust ETF’s total net asset value as of December 31, 2021 was \$4,035,693 or \$23.33 per Unit (“FDN”) and \$17.87 per Hedged Unit (“FDN.F”). The First Trust ETF’s total net asset value as of December 31, 2020 was \$4,680,275 or \$24.76 per FDN and \$19.34 per FDN.F.

For the year ended December 31, 2021, the First Trust ETF paid total cash distributions per unit of \$1.6600 for FDN and \$2.06 for FDN.F.

Investment Performance

For the year ended December 31, 2021, FDN returned -4.23% compared to the S&P 500[®] Index (the “benchmark”) return of 27.61% while FDN.F returned -4.16% compared to the S&P 500[®] Index (CAD-Hedged) (the “hedged benchmark”) total return of 28.41%. Unlike the benchmark and the hedged benchmark, the First Trust ETF’s returns are net of fees and expenses.

The First Trust ETF underperformed the benchmark and the hedged benchmark during the reporting period. Prior to conversion, the First Trust ETF held primarily Consumer Staples companies which underperformed during the initial period. After conversion, underperformance primarily came through poor selection seen within the Information Technology and Health Care sectors. Relative performance also suffered after conversion due to both a significant overweight position in and selection of Communication Services equities.

The First Trust ETF’s only holding, the Underlying Fund, held 42 equity securities as of December 31, 2021. The top ten equity holdings for the Underlying Fund accounted for 51.08% of the portfolio within the Underlying Fund.

The Underlying Fund’s top five stocks by contribution to return were Alphabet Inc. Class A, Alphabet Inc. Class C, Cisco Systems, Inc. Meta Platforms Inc. Class A, and Datadog Inc Class A. The bottom five stocks by contribution to return were Zoom Video Communications, Inc. Class A, Teladoc Health, Inc., Coupa Software, Inc., Pinterest, Inc. Class A, and Zillow Group, Inc. Class C.

The U.S. dollar depreciated 0.93% against the Canadian dollar from December 31, 2020, to December 31, 2021. FDN.F hedges its exposure to the U.S. dollar.

Recent Developments

In February 2021, the First Trust AlphaDEX™ U.S. Consumer Staples Sector Index ETF changed its investment objective to replicate, to the extent possible, the performance of an index of U.S. companies involved in the internet industry, the Dow Jones Internet Composite IndexSM. Technology companies overcame first half underperformance to outperform the broad market for the full year. A shortage of semiconductors shocked all levels of the supply chain as wait times lengthened and hardware producers fought margin compression in order to deliver product on a timely basis. Technology companies that rely more heavily on software solutions than hardware solutions were relatively spared from the economic headwinds. New trends such as Web 3.0, the metaverse, and increased scrutiny under government regulation appeared. CEOs of mega cap internet names such as Facebook (now Meta), Alphabet, Amazon, and Apple all spent time testifying for Congress on the efforts to ensure privacy and protect youth from potentially harmful effects of their products. 2022 should see the expansion of 5G and Wi-Fi 6 as the public cloud continues to expand and consumers produce data through wearables, vehicles, and IoT enabled home devices.

Related Party Transactions

(b) Seed capital

(1) This information is provided as at December 31 of the period/years shown and is prepared under IFRS.

(2) Net asset value and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the period/year.

(3) Distributions were paid in cash or reinvested in additional units of the First Trust ETF, or both. Non-cash distributions are reinvested in additional units of the First Trust ETF and subsequently consolidated. Neither the number of units held by the unitholder, nor the net asset per unit of the First Trust ETF change as a result of any non-cash distributions.

(4) This table is not intended to be a reconciliation of beginning to ending net asset value per unit.

(5) Effective February 17, 2021, the First Trust ETF is fully invested in the Underlying Fund (See Risk).

(1) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period/year, including the First Trust ETF's proportionate share of the MER of any underlying fund in which the First Trust ETF has invested, and is expressed as an annualized percentage of daily average net asset value during the period/year.

(2) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period/year. This includes the First Trust ETF's proportionate share of the commissions of any underlying fund in which the First Trust ETF has invested.

(3) The First Trust ETF's portfolio turnover rate indicates how actively the First Trust ETF's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the First Trust ETF buying and selling all of the securities in its portfolio once in the course of the period/year. The higher a First Trust ETF's portfolio turnover rate in a period/year, the greater the trading cost payable by the First Trust ETF in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between high turnover rate and the performance of a First Trust ETF.

(4) Effective February 17, 2021, the First Trust ETF is fully invested in the Underlying Fund (See Risk).

Management Fees

The First Trust ETF will pay the Manager a management fee of 0.15% based on the average daily NAV of the First Trust ETF. The management fee, plus applicable taxes including HST, will be accrued daily and paid monthly in arrears. The Manager may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time.

The First Trust ETF will bear the Underlying Fund's management fee of 0.40% per annum on average daily net assets on the First Trust ETF's portfolio assets invested in the Underlying Fund. Accordingly, the management fee cost to unitholders of their investment will be 0.55% per annum of NAV of the First Trust ETF plus applicable taxes.
