## Management Report of Fund Performance

### For the six-month period ended June 30, 2022

#### **Investment Objective and Strategy**

The fundamental investment objective of **First Trust Nasdaq Cybersecurity ETF** (the “First Trust ETF”) is to replicate, to the extent possible, the performance of an index of U.S. companies in the cybersecurity industry, initially the Nasdaq CTA Cybersecurity Index™.

The Nasdaq CTA Cybersecurity Index™ is designed to track the performance of companies engaged in the cybersecurity segment of the technology and industrials sectors. It includes companies primarily involved in the building, implementation, and management of security protocols applied to private and public networks, computers, and mobile devices in order to provide protection of the integrity of data and network operations.

#### **Risk**

The First Trust ETF provides exposure to its index by investing all or substantially all of its assets in an underlying U.S. index fund known as First Trust Nasdaq Cybersecurity ETF (the “Underlying Fund”), which is managed by the First Trust ETF’s portfolio advisor.

The risks associated with an investment in the First Trust ETF is discussed in the First Trust ETF’s most recent prospectus.

#### **Results of Operations**

##### **General**

The First Trust ETF’s net asset value as of June 30, 2022 was \$26,235,278 or \$30.16 per unit. The First Trust ETF’s net asset value as of December 31, 2021 was \$32,756,587 or \$39.00 per unit.

For the six-month period ended June 30, 2022, the First Trust ETF paid total cash distributions per unit of \$0.4199. In addition, the First Trust ETF declared cash distributions per unit of \$0.0036 for record date of June 30, 2022 with payment date of July 8, 2022.

##### **Investment Performance**

For the six-month period ended June 30, 2022, the First Trust ETF returned -22.46% compared to the S&P 500® Index (the “benchmark”) return of -18.26%. Unlike the benchmark, the First Trust ETF’s return is net of fees and expenses.

The First Trust ETF’s only holding, the Underlying Fund, held 38 equity securities as of June 30, 2022. The top ten equity holdings for the Underlying Fund accounted for 46.54% of the portfolio within the Underlying Fund.

The Underlying Fund underperformed the benchmark during the reporting period. The Underlying Fund had a heavy overweight of Information Technology, which was the third worst performing sector within the benchmark. Stock selection within Information Technology also contributed to underperformance. Additionally, currency effects contributed to the underperformance as the U.S. dollar appreciated significantly relative to leading global currencies during the period. The underperformance was mitigated by both stock selection within and an overweight allocation to Industrials.

The Underlying Fund’s top five stocks by contribution to return were Thales S.A., Mandiant, Inc., SailPoint Technologies Holdings, Inc., Leidos Holdings, Inc., and ManTech International Corporation. The bottom five stocks by contribution to return were Cloudflare, Inc., Zscaler, Inc., Cisco Systems, Inc., Okta, Inc., and Accenture PLC.

#### **Recent Developments**

Cybercrime remains elevated as government agencies, hospital networks, corporations, energy companies and others face constant network threats. Companies must protect against corporate espionage, loss of client data, unauthorized computer access and much more at a time when more users are remotely connecting to networks outside of the traditional corporate firewall. Cybersecurity solutions must be dynamic as attackers quickly adapt to new solutions. Cloud solutions have been increasingly adopted and a new set of highly scalable businesses built on

new security solution sets, such as zero-trust, have emerged and attracted large amounts of corporate spending. While new technology solutions must be protected, existing ones also require securing. This has enabled the market for cybersecurity solutions to continue expanding and offers investors securities with generally high growth rates relative to the broader market. In fact, according to Statista, spending on cybersecurity was nearly \$41B in 2019 and is estimated to have eclipsed \$54B in 2021. The Credit Suisse CIO survey provides an insight into possible corporate spending initiatives and expected areas of focus for CAPEX and Research & Development. While hyperscale cloud migration is the top priority, five of the top ten corporate spending priorities are cybersecurity related for CIOs. Within technology, Cybersecurity is expected to remain more defensive as the elevated threat profile induces companies to continue investing in security initiatives. Recent market weakness has brought multiples closer to historical average and may present an opportunity for long-term investors.

(1) This information is provided as at June 30, 2022 and December 31 of the years shown and is prepared under IFRS.

(2) Net asset value and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the period/year.

(3) Distributions were paid in cash or reinvested in additional units of the First Trust ETF, or both. Non-cash distributions are reinvested in additional units of the First Trust ETF and subsequently consolidated. Neither the number of units held by the unitholder, nor the net asset per unit of the First Trust ETF change as a result of any non-cash distributions.

(4) This table is not intended to be a reconciliation of beginning to ending net asset value per unit.

#### Ratios and Supplemental Data

CIBR	Jun. 30, 2022	Dec. 31, 2021 <sup>(a)</sup>	Dec. 31, 2020	Dec. 31, 2019	Dec. 31, 2018	Dec. 31, 2017

Portfolio turnover rate <sup>(3)</sup>	28.75%	148.99%	431.90%	173.25%	370.25%	321.12%

(a) Effective February 17, 2021, the First Trust ETF is fully invested in the Underlying Fund.

(1) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period/year, including the First Trust ETF's proportionate share of the MER of the Underlying Fund in which the First Trust ETF has invested, and is expressed as an annualized percentage of daily average net asset value during the period/year.

(2) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period/year. This includes the First Trust ETF's proportionate share of the commissions of Underlying Fund in which the First Trust ETF has invested.

(3) The First Trust ETF's portfolio turnover rate indicates how actively the First Trust ETF's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the First Trust ETF buying and selling all of the securities in its portfolio once in the course of the period/year. The higher a First Trust ETF's portfolio turnover rate in a period/year, the greater the trading cost payable by the First Trust ETF in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between high turnover rate and the performance of a First Trust ETF.
