INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE
June 30, 2026

First Trust Cloud Computing ETF
(the "First Trust ETF")

This interim management report of fund performance contains financial highlights but does not contain either the interim financial report or annual financial statements of the First Trust ETF. You can get a copy of the interim financial report or annual financial statements at your request, and at no cost, by calling 1-877-622-5552, by writing to us at FT Portfolios Canada Co., 40 King Street West, Suite 5102, Scotia Plaza, Box 312, Toronto, Ontario M5H 3Y2 or by visiting our web site at www.firsttrust.ca or SEDAR+ at www.sedarplus.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

Forward-looking Statements

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts but instead represent beliefs regarding future events. By their nature, forward-looking statements are based on assumptions and are subject to inherent risks and uncertainties. There is significant risk that forward-looking statements will not prove to be accurate. Readers of this document should not place undue reliance on forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the expectations, estimates or intentions expressed or implied in the forward-looking statements. These factors include but are not limited to market and general economic conditions, interest rates, foreign currency exchange rates, the extent of industry sector exposure, the performance of the securities of the issuers held in the portfolio and regulatory developments and the risks detailed in the First Trust ETF's prospectus. The Manager does not undertake and specifically disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

First Trust Cloud Computing ETF
Management Report of Fund Performance
For the six-month period ended June 30, 2026

Investment Objective and Strategy

The fundamental investment objective of **First Trust Cloud Computing ETF** (the "First Trust ETF") is to replicate, to the extent possible, the performance of an index of U.S. companies involved in the cloud computing industry, initially the ISE CTA Cloud Computing™ Index.

The ISE CTA Cloud Computing™ Index is a modified equal weighted index designed to track the performance of companies involved in the cloud computing industry. To be included in the index, a security must be classified as a Cloud Computing company by the Consumer Technology Association.

Risk

The First Trust ETF provides exposure to its index by investing all or substantially all of its assets in an underlying U.S. index fund known as First Trust Cloud Computing ETF (the "Underlying Fund"), which is managed by the First Trust ETF's portfolio advisor.

The risks associated with an investment in the First Trust ETF is discussed in the First Trust ETF's most recent prospectus.

Results of Operations

General

The First Trust ETF's net asset value as of June 30, 2026, was $3,681,478 or $33.47 per unit. The First Trust ETF's net asset value as of December 31, 2025, was $3,447,052 or $31.34 per unit.

There were no cash distributions paid nor declared for the six-month period ended June 30, 2026 by the First Trust ETF.

Investment Performance

For the six-month period ended June 30, 2026, the First Trust ETF returned 6.80% compared to the S&P 500® Index (the "benchmark") return of 14.07%. Unlike the benchmark, the First Trust ETF's return is net of fees and expenses.

The First Trust ETF's only holding, the Underlying Fund, held 63 equity securities as of June 30, 2026. The top ten equity holdings for the Underlying Fund accounted for 36.17% of the portfolio within the Underlying Fund.

The Underlying Fund underperformed the benchmark during the period due to stock selection, primarily within the Information Technology sector. However, an overweight position in the Information Technology sector helped produce a positive allocation effect that partly offset the underperformance.

The Underlying Fund's top five stocks by contribution to return were DigitalOcean Holdings, Inc., Dell Technologies Inc., Hewlett Packard Enterprise Company, CoreWeave, Inc., and Cisco Systems, Inc. The Underlying Fund's bottom five stocks by contribution to return were HubSpot, Inc., MongoDB, Inc., Atlassian Corporation, Workiva Inc., and Salesforce, Inc.

The First Trust's ETF's exposure to the U.S. dollar contributed to its absolute performance during the period, as the U.S. dollar appreciated 3.55% against the Canadian dollar from December 31, 2025, to June 30, 2026.

Recent Developments

Cloud computing so far in 2026 has been characterized by a continuation of the artificial intelligence ("AI") tailwinds from 2025, the threat of increased competition on the application side, and greater clarity on a key challenge facing the industry at large. Firstly, the three major cloud providers (Azure, AWS, and GCP) have continued to grow against high bars with large backlogs and capacity constraints. Cloud continues to be a clear beneficiary of AI as workloads are run on the cloud to support model training, inference, and enterprise adoption. Meanwhile, cloud applications experienced divergent performance as the market continues to wrestle with how to value application software against the threat of AI-natives. Lastly, industry leaders such as Jensen Huang and Michael Dell have recently suggested that we could see more investment in on-prem compute as companies prioritize cost savings from open-source models and ownership of proprietary data. At a high level, the advantages of cloud workflows are real and are not going away, but there are some narratives in the market that warrant attention.

Related Party Transactions

FT Portfolios Canada Co. is the Manager of the First Trust ETF and is a Canadian affiliate of First Trust Advisors L.P., the investment advisor (the “Advisor”) of the First Trust ETF.

(a) For the year 2021, the investment objective of the First Trust changed effective February 17, 2021.
(1) This information is provided as at June 30, 2026 and December 31 of the period/years shown and is prepared under IFRS® Accounting Standards as issued by the International Accounting Standards Board ("IASB").
(2) Net asset value and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the period/year.
(3) Distributions were paid in cash or reinvested in additional units of the First Trust ETF, or both. Non-cash distributions are reinvested in additional units of the First Trust ETF and subsequently consolidated. Neither the number of units held by the unitholder, nor the net asset per unit of the First Trust ETF change as a result of any non-cash distributions.
(4) This table is not intended to be a reconciliation of beginning to ending net asset value per unit.

Ratios and Supplemental Data

SKYY	2026	2025	2024	2023	2022	2021[(a)]

Portfolio turnover rate[(3)]	77.87%	12.99%	46.01%	0.00%	51.44%	82.22%

(a) For the year 2021, the investment objective of the First Trust changed effective February 17, 2021.
(1) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period/year, including the First Trust ETF's proportionate share of the MER of the Underlying Fund in which the First Trust ETF has invested, and is expressed as an annualized percentage of daily average net asset value during the period/year.
(2) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period/year.
(3) The First Trust ETF's portfolio turnover rate indicates how actively the First Trust ETF's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the First Trust ETF buying and selling all of the securities in its portfolio once in the course of the period/year. The higher a First Trust ETF's portfolio turnover rate in a period/year, the greater the trading cost payable by the First Trust ETF in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between high turnover rate and the performance of a First Trust ETF.

Management Fees

The First Trust ETF will pay the Manager a management fee of 0.15% based on the average daily NAV of the First Trust ETF. The management fee, plus applicable taxes including HST, will be accrued daily and paid monthly in arrears. The Manager may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time.

The First Trust ETF's management fee will also bear the management fee of the Underlying Fund.

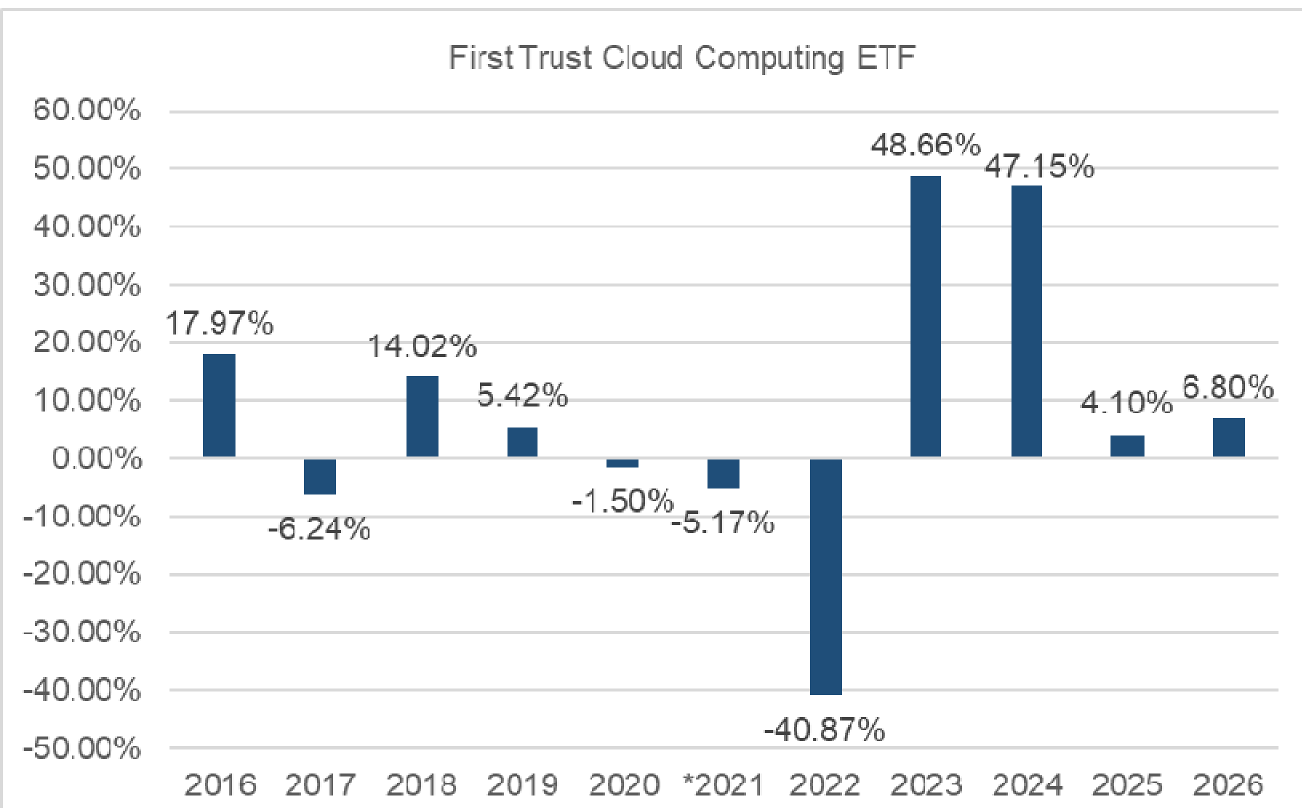
Past Performance

General

The past performance information shown assumes that all distributions made by the First Trust ETF in the period/years shown were reinvested in additional securities of the First Trust ETF. The performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the First Trust ETF has performed in the past does not necessarily indicate how it will perform in the future.

Year by Year Returns

The bar chart below shows the First Trust ETF's performance for the six-month period ended June 30, 2026 and for the years ended December 31 and illustrates how the investment fund's performance has changed from year to year. The chart also shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year.



**For the year 2021, the investment objective of the First Trust ETF changed effective February 17, 2021.*
