Forward-looking Statements

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts but instead represent beliefs regarding future events. By their nature, forward-looking statements are based on assumptions and are subject to inherent risks and uncertainties. There is significant risk that forward-looking statements will not prove to be accurate. Readers of this document should not place undue reliance on forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the expectations, estimates or intentions expressed or implied in the forward-looking statements. These factors include but are not limited to market and general economic conditions, interest rates, foreign currency exchange rates, the extent of industry sector exposure, the performance of the securities of the issuers held in the portfolio and regulatory developments and the risks detailed in the First Trust ETF's prospectus. The Manager does not undertake and specifically disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Investment Objective and Strategy

The fundamental investment objective of **First Trust Nasdaq Cybersecurity ETF** (the “First Trust ETF”) is to replicate, to the extent possible, the performance of an index of U.S. companies in the cybersecurity industry, initially the Nasdaq CTA Cybersecurity IndexSM.

The Nasdaq CTA Cybersecurity IndexSM is designed to track the performance of companies engaged in the cybersecurity segment of the technology and industrials sectors. It includes companies primarily involved in the building, implementation, and management of security protocols applied to private and public networks, computers, and mobile devices in order to provide protection of the integrity of data and network operations.

Risk

In February 2021, the First Trust AlphaDEXTM U.S. Consumer Discretionary Sector Index ETF changed its investment objectives (see Investment Objective and Strategy) and its name to the First Trust ETF. The First Trust ETF provides exposure to its new index by investing all or substantially all of its assets in an underlying U.S. index fund known as First Trust Nasdaq Cybersecurity ETF (the “Underlying Fund”), which is managed by the First Trust ETF’s portfolio advisor. The effective date of change is February 17, 2021.

The risks associated with an investment in the First Trust ETF is discussed in the First Trust ETF’s most recent prospectus.

Results of Operations

General

The First Trust ETF’s net asset value as of June 30, 2021 was \$7,141,091 or \$34.01 per unit. The First Trust ETF’s net asset value as of December 31, 2020 was \$4,559,184 or \$30.39 per unit.

For the six-month period ended June 30, 2021, the First Trust ETF paid total cash distributions per unit of \$0.0310. The First Trust ETF did not declare cash distributions for record date of June 30, 2021.

Investment Performance

For the six-month period ended June 30, 2021, the First Trust ETF returned 11.88% compared to the S&P 500 Index (the “benchmark”) return of 12.02%. Unlike the benchmark, the First Trust ETF’s return is net of fees and expenses.

The First Trust ETF underperformed the S&P 500 Index during the period due to stock selection in Information Technology after the conversion. Prior to the change, the First Trust ETF held primarily Consumer Discretionary stocks which outperformed the benchmark during the initial period. After the change, poor selection within Information Technology detracted from relative returns including all five of the bottom contributors to return. Mitigating underperformance were an underweight allocation to Consumer Discretionary which underperformed the benchmark during the latter period and an overweight allocation to Industrials which outperformed in the benchmark during the later period.

The First Trust ETF’s only holding, the Underlying Fund, held 40 equity securities as of June 30, 2021. The top ten equity holdings for the Underlying Fund accounted for 47.09% of the portfolio within the Underlying Fund.

The Underlying Fund’s top five stocks by contribution to return were Fortinet, Inc., Cisco Systems, Inc., Cloudflare Inc Class A, Proofpoint, Inc., and Accenture Plc Class A. The bottom five stocks by contribution to return were Splunk Inc., CyberArk Software Ltd., FireEye, Inc., Tenable Holdings, Inc., Check Point Software Technologies Ltd.

Recent Developments

In February 2021, the First Trust AlphaDEXTM U.S. Consumer Discretionary Sector Index ETF changed its investment objectives to replicate, to the extent possible, the performance of an index of U.S. companies in the cybersecurity industry, the Nasdaq CTA Cybersecurity IndexSM. Cybercrime is on the rise as documented attacks against government agencies, hospital networks, corporations, energy companies and others are up. In fact, according to

First Trust Nasdaq Cybersecurity ETF Management Report of Fund Performance For the six-month period ended June 30, 2021

Chainalysis ransomware payments have risen by 311% in 2020. The acceleration in attacks has partly been made possible by the rise of cryptocurrencies such as Bitcoin. The ability for direct online payments, irrespective of location, and the difficulty in tracing transactions has made cyber ransom attacks particularly attractive. Companies must protect against corporate espionage, loss of client data, unauthorized computer access and much more at a time when more users are remotely connecting to networks outside of the traditional corporate firewall. Cybersecurity solutions must be dynamic as attackers quickly adapt to new solutions. Cloud solutions have been increasingly adopted and a new set of highly scalable businesses built on new security solution sets, such as zero-trust, have emerged and attracted large amounts of corporate spending. While new technology solutions must be protected existing ones also require securing. This has enabled the market for cybersecurity solutions to continue expanding and offers investors securities with generally high growth rates relative to the broader market. In fact, according to Statista, spending on cybersecurity was nearly \$41B in 2019 and is forecasted to eclipse \$54B in 2021.

(1) This information is provided as at June 30, 2021 and December 31 of the years shown and is prepared under IFRS.

(2) Net asset value and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the period/year.

(3) Distributions were paid in cash or reinvested in additional units of the First Trust ETF, or both. Non-cash distributions are reinvested in additional units of the First Trust ETF and subsequently consolidated. Neither the number of units held by the unitholder, nor the net asset per unit of the First Trust ETF change as a result of any non-cash distributions.

(4) This table is not intended to be a reconciliation of beginning to ending net asset value per unit.

Ratios and Supplemental Data

Net asset value per unit	\$34.01	\$30.39	\$27.84	\$23.94	\$25.29	\$22.86

(1) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period/year, including the First Trust ETF's proportionate share of the MER of any underlying fund in which the First Trust ETF has invested, and is expressed as an annualized percentage of daily average net asset value during the period/year.

(2) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period/year. This includes the First Trust ETF's proportionate share of the commissions of any underlying fund in which the First Trust ETF has invested.

(3) The First Trust ETF's portfolio turnover rate indicates how actively the First Trust ETF's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the First Trust ETF buying and selling all of the securities in its portfolio once in the course of the period/year. The higher a First Trust ETF's portfolio turnover rate in a period/year, the greater the trading cost payable by the First Trust ETF in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between high turnover rate and the performance of a First Trust ETF.

Management Fees

The First Trust ETF will pay the Manager a management fee of 0.15% based on the average daily NAV of the First Trust ETF. The management fee, plus applicable taxes including HST, will be accrued daily and paid monthly in arrears. The Manager may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time.

The First Trust ETF will bear the Underlying Fund's management fee of 0.60% per annum on average daily net assets on the First Trust ETF's portfolio assets invested in the Underlying Fund. Accordingly, the management fee cost to unitholders of their investment will be 0.75% per annum of NAV of the First Trust ETF plus applicable taxes.

Past Performance

General

The past performance information shown assumes that all distributions made by the First Trust ETF in the period/years shown were reinvested in additional securities of the First Trust ETF. The performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the First Trust ETF has performed in the past does not necessarily indicate how it will perform in the future.

Year by Year Returns

The bar chart below shows the First Trust ETF's performance for the six-month period ended June 30, 2021, for the years ended December 31, and for the period from commencement of operations to December 31, 2014 and illustrates how the investment fund's performance has changed from year to year. The chart also shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year.
