INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE

June 30, 2020

First Trust Value Line® Dividend Index ETF (CAD-Hedged) **(the “First Trust ETF”)**

This interim management report of fund performance contains financial highlights but does not contain the complete unaudited interim financial statements of the First Trust ETF. All references to dollars contained herein are to Canadian dollars.

Securityholders may also contact us to request a copy of the First Trust ETF's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosures relating to the First Trust ETF by calling 1-877-622-5552, by writing to us at FT Portfolios Canada Co., 40 King Street West, Suite 5102, Scotia Plaza, Box 312, Toronto, Ontario M5H 3Y2 or by visiting our website at www.firsttrust.ca or SEDAR at www.sedar.com.

Forward-looking Statements

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts but instead represent beliefs regarding future events. By their nature, forward-looking statements are based on assumptions and are subject to inherent risks and uncertainties. There is significant risk that forward-looking statements will not prove to be accurate. Readers of this document should not place undue reliance on forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the expectations, estimates or intentions expressed or implied in the forward-looking statements. These factors include but are not limited to market and general economic conditions, interest rates, foreign currency exchange rates, the extent of industry sector exposure, the performance of the securities of the issuers held in the portfolio and regulatory developments and the risks detailed in the First Trust ETF's prospectus. The Manager does not undertake and specifically disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

First Trust Value Line® Dividend Index ETF (CAD-Hedged)

Management Report of Fund Performance

For the six-month period ended June 30, 2020

Investment Objective and Strategy

The fundamental investment objective of **First Trust Value Line® Dividend Index ETF (CAD-Hedged)** is to replicate, to the extent possible, the performance of the Value Line® Dividend Index (the “Index”) on a currency hedged basis, net of expenses. The Index is a modified equal-dollar weighted index comprised of U.S. exchange-listed securities of companies that pay above-average dividends and have the potential for capital appreciation. Securities are selected for inclusion in the Index by using Value Line’s Safety™ Ranking System which ranks a stock’s price stability based on standard deviation and its financial condition based on several measures of financial performance.

The investment strategy of the First Trust ETF is to invest in and hold a proportionate share of the constituent securities of the Index, or other securities, to seek to replicate the performance of such Index. The First Trust ETF may also hold cash and cash equivalents or other money market instruments to fund current liabilities.

FT Portfolios Canada Co. (the “Manager”), the Manager may use a sampling methodology in selecting investments for the First Trust ETF. As an alternative or in conjunction with investing in and holding constituent securities, the First Trust ETF may also invest in other securities to obtain exposure to the constituent securities of the Index in a manner that is consistent with the investment objective and investment strategy of the First Trust ETF. The First Trust ETF may also obtain exposure to the Index by holding securities of a US-listed index ETF of an affiliate of the Manager, First Trust Value Line® Dividend Index Fund, which replicates or substantially replicates the performance of the Index.

The Index begins with the universe of U.S. stocks, excluding all registered investment companies, limited partnerships and foreign securities not listed in the U.S., that Value Line® gives a Safety™ Ranking of #1 or #2 using the Value Line® Safety™ Ranking System. The Safety™ ranking measures the total risk of a stock relative to the other stocks in the Value Line universe. From those stocks, Value Line® selects those companies with a higher than average dividend yield, as compared to the indicated dividend yield of the Standard & Poor’s 500 Composite Stock Price Index. Value Line® then eliminates those companies with an equity market capitalization of less than US \$1 billion. The Index is equally weighted and rebalanced on a monthly basis.

Risk

The Index the First Trust ETF tracks utilizes a rules-based stock selection process and can result in sector weightings that differ from the primary and secondary benchmarks, S&P 500 Index (CAD-Hedged) total return and Dow Jones US Select Dividend Index Return (USD), respectively. The ability of the underlying securities to pay a dividend in the future is dependent on factors that are not controlled by fund management. A security held in the First Trust ETF may, at any time, decide to cut or eliminate its dividend payment. Given the First Trust ETF employs a currency hedging strategy to minimize the impact of changes in the USD-CAD exchange rate and considering that the portfolio remains consistent in its application of the AlphaDEX™ stock selection methodology to pick stocks for the portfolio, we conclude there was no material change to the risk profile of the First Trust ETF. Investors should refer to the most recent prospectus as it contains detailed discussion of risk relating to the investment of the First Trust ETF.

Results of Operations

General

The First Trust ETF’s total net asset value as of June 30, 2020 was \$16,692,056 or \$25.69 per Common Class unit (“FUD”) and \$25.66 per Advisor Class unit (“FUD.A”). The First Trust ETF’s total net asset value as of December 31, 2019 was \$18,550,052 or \$30.93 per Common Class unit (“FUD”) and \$30.88 per Advisor Class unit (“FUD.A”).

First Trust Value Line® Dividend Index ETF (CAD-Hedged)

Management Report of Fund Performance

For the six-month period ended June 30, 2020

For the six-month period ended June 30, 2020, the First Trust ETF paid total cash distributions per unit of \$0.3600 for FUD and \$0.2100 for FUD.A. In addition, the First Trust ETF declared cash distributions per unit of \$0.0550 for FUD and \$0.0300 for FUD.A for record date of June 30, 2020 with payment date of July 8, 2020.

Investment Performance

For the six-month period ended June 30, 2020, FUD returned -15.82% and FUD.A returned -16.27% compared to the primary and secondary benchmarks, S&P 500 Index (CAD-Hedged) total return of -3.69% and Dow Jones U.S. Select Dividend Index Return (USD) total return of -21.68%. Unlike the benchmarks, the First Trust ETF's returns are net of fees and expenses.

The First Trust ETF underperformed the broad benchmark during the period. Information Technology holdings lagged the benchmark on a relative basis as the sector was underweight and had a negative selection effect. The sector was the top performing group in the S&P 500 for the period as well as only one of the two positive sectors in the benchmark. Financials and Utilities also underperformed on a relative basis due to their overweight positions. Industrials boosted performance as the group benefitted from positive stock selection during the period. Value and dividend stocks trailed the benchmark, while quality and momentum were the best performing factors year to date.

The top five stocks by contribution to return were Arthur J. Gallagher & Co., Lowe's Companies, Inc., Home Depot, Inc., Constellation Brands, Inc. Class A, and Rockwell Automation, Inc.. The bottom five stocks by contribution to return were Cincinnati Financial Corporation, Cheesecake Factory Incorporated, Argo Group International Holdings, Ltd., WPP Plc Sponsored ADR and, Simon Property Group, Inc.

The portfolio held 188 equity securities on June 30, 2020. The top ten equity holdings accounted for 5.51% of the portfolio. Financials, Utilities and Industrials were the top three sector weightings at the beginning of the period. On December 31, 2019, the top three sector weights were Utilities, Financials and Industrials. The most overweight sectors at the end of the period were Financials, Utilities, and Industrials. The most underweight sectors at the end of the period were Information Technology, Health Care, and Consumer Discretionary. At the beginning of the period, the most overweight sectors were Consumer Staples, Real Estate, and Materials. The most underweight sectors at the beginning of the period were Information Technology, Health Care, and Communication Services. The First Trust ETF maintains a focus on large cap dividend paying equities. During the period, the First Trust ETF added 19 positions and removed 32 positions.

During the period, appreciation in the U.S. dollar versus the Canadian dollar was detrimental for the First Trust ETF given the currency hedge.

Recent Developments

Market volatility significantly increased due to the COVID-19 pandemic during the first half of 2020. The Federal Reserve, along with Congress, took action to combat the economic fallout presented with the shutdown. Interest rates were held down due to the Federal Reserve's target rate being cut to near zero in March. The uncertainty presented during the economic disruption stalled consumer spending and shifted transaction locations from brick and mortar to even more electronic shopping. Internet commerce has been trending upward with the likes of Amazon pushing retailers such as Target and Wal-Mart to adopt a more robust e-commerce platform. Energy companies were also hit by the slowdown. Crude oil traded in negative territory after demand plummeted in the early phases of the shutdown. In the second quarter, some states reopened despite rising cases across the country. Arizona, Florida, California and Texas saw a rapid increase in positive COVID-19 cases along with increased testing. These states reverted to a stricter lockdown and more guidance and mandates pertaining to personal protective equipment and indoor occupancy. States will now be faced with the decision to reopen their economies or face a setback if cases spike later in the year.

First Trust Value Line® Dividend Index ETF (CAD-Hedged)

(1) This information is provided as at June 30, 2020 and December 31 years shown and is prepared under IFRS.

(2) Net asset value and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the period/year.

(3) Distributions were paid in cash or reinvested in additional units of the First Trust ETF, or both. Non-cash distributions are reinvested in additional units of the First Trust ETF and subsequently consolidated. Neither the number of units held by the unitholder, nor the net asset per unit of the First Trust ETF change as a result of any non-cash distributions.

(4) This table is not intended to be a reconciliation of beginning to ending net asset value per unit.

Net asset value per unit	\$25.66	\$30.88	\$25.35	\$27.16	\$24.35	\$21.73

(1) Management expense ratio is based on total expenses for the stated period and is expressed as an annualized percentage of daily average net asset value during the period/year.

(2) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period/year.

(3) The First Trust ETF's portfolio turnover rate indicates how actively the First Trust ETF's Portfolio Advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the First Trust ETF buying and selling all of the securities in its portfolio once in the course of the period/year. The higher a First Trust ETF's portfolio turnover rate in a year, the greater the trading cost payable by the First Trust ETF in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between high turnover rate and the performance of a First Trust ETF.

Management Fees

The First Trust ETF will pay the Manager a management fee of 0.70% and, in respect of the FUD.A, an additional amount for a service fee (see "FUD.A Service Fee" below) based on the average daily NAV of the First Trust ETF. The management fee, plus applicable taxes including HST, will be accrued daily and paid monthly in arrears. The Manager may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time.

FUD.A Service Fee

The Manager pays registered dealers a service fee equal to 1.00% per annum of the NAV held by clients of the registered dealer, plus any applicable taxes. The service fee will be calculated and accrued daily and paid quarterly at the end of each calendar quarter.

Past Performance

General

The past performance information shown assumes that all distributions made by the First Trust ETF in the period/years shown were reinvested in additional securities of the First Trust ETF. The performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the First Trust ETF has performed in the past does not necessarily indicate how it will perform in the future.

Year by Year Returns

The bar chart below shows the First Trust ETF's performance, per class, for the six-month period ended June 30, 2020, for the years ended December 31, and for the period from commencement of operations to December 31, 2013 and illustrates how the investment fund's performance has changed from year to year. The chart also shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year.
