Forward-looking Statements

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts but instead represent beliefs regarding future events. By their nature, forward-looking statements are based on assumptions and are subject to inherent risks and uncertainties. There is significant risk that forward-looking statements will not prove to be accurate. Readers of this document should not place undue reliance on forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the expectations, estimates or intentions expressed or implied in the forward-looking statements. These factors include but are not limited to market and general economic conditions, interest rates, foreign currency exchange rates, the extent of industry sector exposure, the performance of the securities of the issuers held in the portfolio and regulatory developments and the risks detailed in the First Trust ETF’s prospectus. The Manager does not undertake and specifically disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Investment Objective and Strategy

The fundamental investment objective of **First Trust Tactical Bond Index ETF** (the “First Trust ETF”) is to replicate, to the extent possible, the performance of the NASDAQ Canadian Preservation CAD TRSM (the “Index”), net of expenses.

The investment strategy of the First Trust ETF is to invest in and hold the constituent securities of the Index in the same proportion as they are reflected in the Index or securities intended to replicate the performance of such Index. The First Trust ETF may also hold cash and cash equivalents or other money market instruments to fund current liabilities.

The Index seeks to construct a dynamic fixed income portfolio that provides exposure to several different fixed income asset classes and consists of ETFs.

The Manager may use a sampling methodology in selecting investments for the First Trust ETF. As an alternative or in conjunction with investing in and holding constituent securities, the First Trust ETF may also invest in other securities to obtain exposure to the constituent securities of the applicable Index in a manner that is consistent with the investment objective and investment strategy of the First Trust ETF.

Risk

The risks associated with an investment in the First Trust ETF remain as discussed in the First Trust ETF’s most recent prospectus. There have been no significant changes during the period that affected the overall level of risk associated with the First Trust ETF.

Results of Operations

General

The First Trust ETF’s net asset value as of December 31, 2019 was \$10,972,765 or \$18.29 per unit. The First Trust ETF’s net asset value as of December 31, 2018 was \$21,576,719 or \$17.98 per unit.

For the year ended December 31, 2019, the First Trust ETF paid total cash distributions per unit of \$0.6000. In addition, the First Trust ETF declared cash distributions per unit of \$0.0500 for record date of December 31, 2019 with payment date of January 8, 2020.

Investment Performance

For the year ended December 31, 2019, the First Trust ETF returned 5.08% compared to the Index return of 5.70%. Unlike the Index, the First Trust ETF’s return is net of fees and expenses.

The First Trust ETF was invested at all times during the period in the securities of various Canadian ETF providers including BlackRock Asset Management Canada Limited, and BMO Asset Management Inc. The First Trust ETF tracks an index which applies a relative strength model on a quarterly basis. During the period, the First Trust ETF rebalanced four times to align the weights of the fund components with the Index.

Convertible bonds were the top contributor to the First Trust ETF’s performance. The asset class was represented by iShares Convertible Bond ETF in the First Trust ETF’s portfolio, which seeks to replicate the performance of the FTSE Canada Convertible Bond Index, net of expenses.

Emerging market bonds were the second highest contributor to the First Trust ETF’s performance. The asset class was represented by BMO Emerging Markets Bond Hedged to CAD ETF in the First Trust ETF’s portfolio, which seeks to replicate the performance of the Barclays Emerging Markets Tradable External Debt (EMTED) GDP Weighted Capped Index CAD Hedged, net of expenses.

Canadian investment-grade bonds were also a strong relative contributor to the First Trust ETF’s performance. This asset class was represented by the BMO Aggregate Bond ETF, iShares Canadian Government Bond ETF, and the

iShares Core Canadian Universe Bond ETF. However, the BMO Aggregate Bond ETF was the largest detractor to the First Trust ETF's performance due to the timing at which the portfolio acquired this ETF.

Recent Developments

In January, positions in Canadian preferred shares and high-yield US corporate bonds were removed and replaced by positions in Canadian investment-grade bonds, and Canadian government bonds. In April, the position in floating rate bonds was removed and replaced with a position in US high-yield bonds. In July, the position in Canadian government bonds was removed and replaced with a position in Canadian real return bonds, which are debt securities linked to the Canadian rate of inflation. In October, positions in emerging markets bonds and Canadian real return bonds were removed and a position in Canadian government bonds was reintroduced while the position in Canadian investment grade bonds was increased by adding the BMO Aggregate Bond ETF to the portfolio.

(a) December 31, 2015 does not relate to the full year as the First Trust ETF commenced operations on June 19, 2015.

(b) Initial offering price

(1) This information is provided as at December 31 of the years/period shown and is prepared under IFRS.

(2) Net asset value and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the period/year.

(3) Distributions were paid in cash or reinvested in additional units of the First Trust ETF, or both. Non-cash distributions are reinvested in additional units of the First Trust ETF and subsequently consolidated. Neither the number of units held by the unitholder, nor the net asset per unit of the First Trust ETF change as a result of any non-cash distributions.

(4) This table is not intended to be a reconciliation of beginning to ending net asset value per unit.

Ratios and Supplemental Data

(1) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period/year, including the First Trust ETF's proportionate share of the MER of any underlying fund in which the First Trust ETF has invested, and is expressed as an annualized percentage of daily average net asset value during the period/year.

(2) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period/year. This includes the First Trust ETF's proportionate share of the commissions of any underlying fund in which the First Trust ETF has invested.

(3) The First Trust ETF's portfolio turnover rate indicates how actively the First Trust ETF's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the First Trust ETF buying and selling all of the securities in its portfolio once in the course of the period/year. The higher a First Trust ETF's portfolio turnover rate in a period/year, the greater the trading cost payable by the First Trust ETF in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between high turnover rate and the performance of a First Trust ETF.

Management Fees

The First Trust ETF will pay the Manager a management fee of 0.50% based on the average daily NAV of the First Trust ETF. The management fee, plus applicable taxes including HST, will be accrued daily and paid monthly in arrears. The Manager may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time.

Past Performance

General

The past performance information shown assumes that all distributions made by the First Trust ETF in the period/years shown were reinvested in additional securities of the First Trust ETF. The performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the First Trust ETF has performed in the past does not necessarily indicate how it will perform in the future.

Year by Year Returns

NASDAQ Canadian Preservation CAD TR Index*	5.70%	2.05%	2.14%

Reference Index - The NASDAQ Canadian Preservation Index utilizes IBIS' Quantitative Tactical Fixed Income Rotation model. The Index will invest in Canadian-listed Exchange-Traded Funds covering various segments of the global fixed income market. The selection of assets is determined through a proprietary technology for Relative Strength. The Index will tactically allocate into five TSX-listed ETFs on an equal-weighted basis based upon IBIS' proprietary model to take advantage of short and long term shifts in quality, duration, and geographic risk within fixed income.
